Full product description

Enterprise-class access point

The **Cambium XE3-4** is a **Tri-band Wi-Fi 6/6E 4x4/2x2** access point designed to deliver future-proof performance and value when building next-generation networks. The total data rate is **6.6 Gbps**. Wi-Fi 6 delivers faster and more efficient wireless network connections than previous generation Wi-Fi technologies.

Key features of the Cambium cnPilot XE3-4

- Tri-Radio/Tri-Band W-Fi 6 and 6E
- Total data rate of 6.6 Gbps
- Software-defined 5 GHz/6 GHz radio

- 2.5 GbE and 1 GbE uplink ports
- EasyPass with Microsoft Azure and Integration with Google G Suite

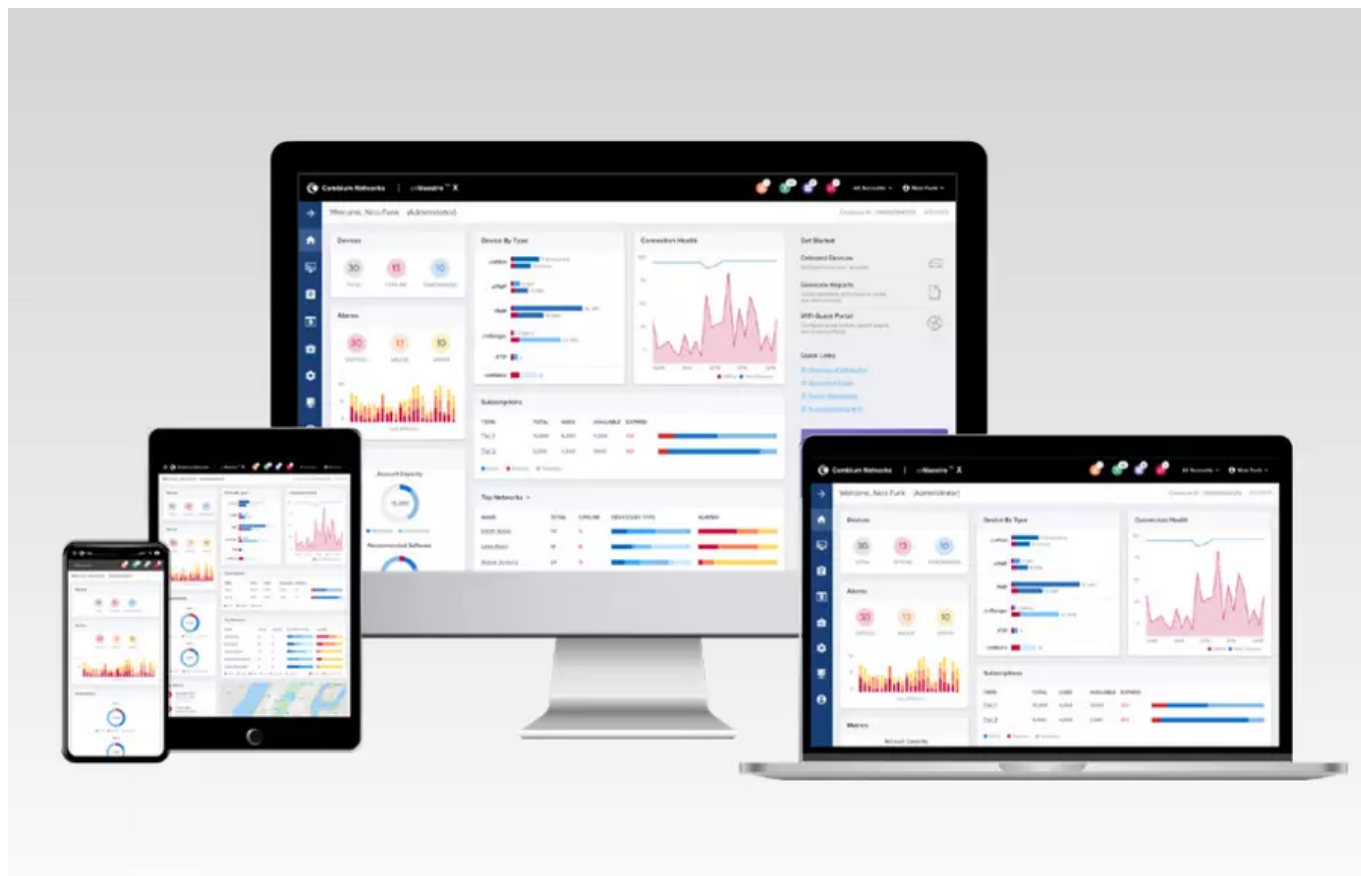

Designed for high-density services

Wi-Fi 6E extends Wi-Fi capacity to the **6 GHz** band which nearly triples the available wireless spectrum. **The XE3-4** is fully backward compatible with existing Wi-Fi technology, enabling simultaneous support for new and legacy client devices, low-bandwidth IoT devices and more - all within a single wireless infrastructure.

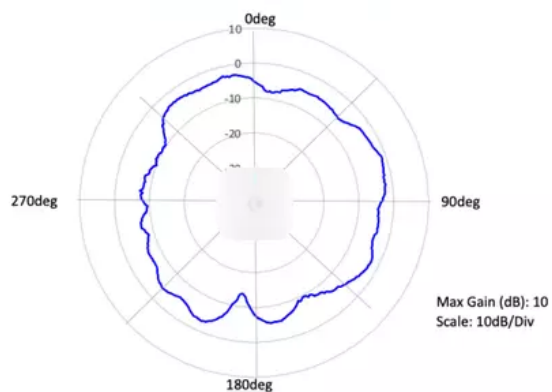

Manage in the cloud and locally

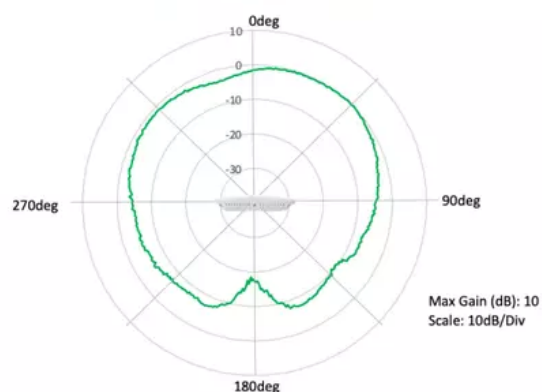

XE3-4 works with Cambium Networks' XMS or cnMaestro cloud-based management system . Choose the management system that best fits your business and take advantage of the latest technology from Cambium **Networks**.
