Full product description

Enterprise-class internal Wi-Fi access point 6

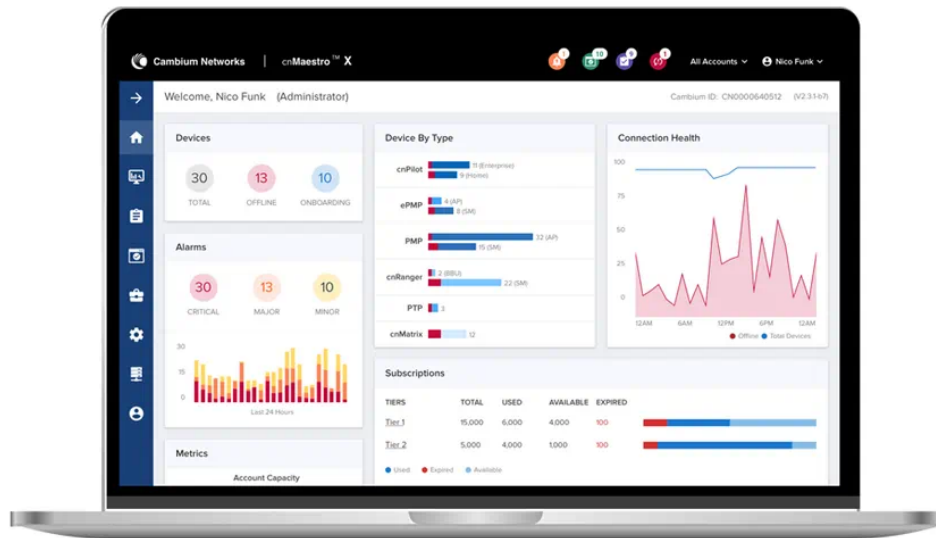

The **Cambium XV2-21X** indoor **Wi-Fi 6 2x2** ceiling-mount access point offers a total throughput of **2.97 Gbps**. It is ideal for hospitality, MDU and small to medium-sized business applications.

Key features of the Cambium XV2-21X access point

Multiplicity of management methods

XV2-21X can be adopted and managed by any **Cambium Networks** management system , **cnMaestro™ Cloud**, **cnMaestro™ X**, **cnMaestro™** locally, or **Swift application-based** management. Choose the type of management you need and change it at any time. Unlike other low-cost access points, the XV2-21X is never limited to one management choice.

Designed for quick installation

The **Cambium XV2-21X** offers multiple installation methods contained in the same shipping package. Mount the AP to a ceiling plate using the included steel plate, mount to an existing junction box with 83-millimeter center-to-center holes, mount the AP to 36-mm, 24-mm and 14-mm T-bars, or simply mount it to any flat surface using the included wall plugs. No additional mounting accessories are needed.
