Full product description

Cisco Catalyst 2960X

This is a Gigabit Ethernet switch type device. **The Cisco Catalyst 2960X series switch** has a configuration that allows it to be stacked. The Catalyst 2960X devices are run on the Cisco IOS. **It is very simple and functional software.** The Cisco Catalyst 290X switch allows for great network management in large or small businesses. Besides, the device is very easy to implement, configure and in case of problems has quick access to technical support. These are stackable switches, fully functional and independent. **The device guarantees extended functionality of the second and third layer.** They have additional power supply Power over Ethernet Plus (PoE +).

The main features of the Cisco Catalyst 2960X series switch are

1. Connectors: 24 or 48 x RJ45 10/100/1000Mbps, 1x console, 4x SFP (1 Gigabit Ethernet Small Form-Factor Pluggable), 2x USB.
2. APM86392 processor with 600 Mhz clocking capability.
3. **Internal memory 512 MB.**
4. Flash memory 128 MB.
5. **Routing capacity about 216 Gbit/s.**
6. **Intelligent use of energy, ensures even allocation of energy for all ports.**

Catalyst 2960X series switches have one fixed power supply and the possibility of additional redundant external power supply (Cisco Redundant Power System [RPS] 2300). The power supplies have fans that guarantee good cooling.
