Full product description

Cisco Meraki GO GR60 - external dual-band Wi-Fi access point, 802.11ac Wave 2, 2x2:2 MU MIMO

Meraki Go is a complete network solution - simple, mobile and secure. Thanks to products managed through **Meraki Go Mobile App** you can set up your network in a few minutes, manage networks Wi-Fi and Ethernet, configure and update security, update software (firmware) and monitor network status. Enjoy all these capabilities in the cloud without subscription fees.

Simple and user-friendly solution

The mobile application gives you in-app technical support. Manage access points by adjusting bandwidth to stream video or download files. Block out malicious websites by separating Wi-Fi from specific business tasks. Meraki Go and Security Gateway network switches make it easy and secure to use Ethernet. Advanced settings such as guest Wi-Fi, location, and splash pages require only a few clicks in the app.

Additional security subscription

A security subscription to protect against phishing and malware is also available and can be purchased to provide additional security. Whether your business provides guests with Wi-Fi or runs a corporate network, or protects devices at the point of sale, Meraki Go will make sure your network is both secure and user-friendly.

Meraki Go - the most important features

- Customizing the welcome page, blocking page access for a specific Wi-Fi or for all connected devices redirected by the Security Gateway
- Visitor information through location analysis
- Remote port switching on and off
- Website creation - Wi-Fi for guests
- In-app support
- Simple safety configuration

Welcome pages and location analysis for all, not just large networks

- Welcome page - welcome guests with a custom message with your trademark and landing pages
- Location analysis - can provide a competitive advantage through the use of guest information, help you make business decisions about staff, inventory, offers, promotions and loyalty programs
- Personalised messages and advertisements for potential customers who come across your company are more likely to convert
- Capture consumer data of consumers who frequently visit competitors' websites
- Monitor seasonal traffic and peak hours to forecast traffic and manage stocks and staff
