### Full product description

#### CISCO Meraki GO GS110-8P-HW - switch with 8 1000 Mbps ports, 2 SFP uplink ports and 67 W PoE power supply

**Meraki Go** is a complete network solution - simple, mobile and secure. Thanks to products managed through **Meraki Go Mobile App** you can set up your network in a few minutes, manage networks Wi-Fi and Ethernet, configure and update security, update software (firmware) and monitor network status. Enjoy all these capabilities in the cloud without subscription fees.

#### Simple and user-friendly solution

The mobile application gives you in-app technical support. Manage access points by adjusting bandwidth to stream video or download files. Block out malicious websites by separating Wi-Fi from specific business tasks. Meraki Go and Security Gateway network switches make it easy and secure to use Ethernet. Advanced settings, such as guest Wi-Fi, location, and splash pages, require only a few clicks in the app.

#### Additional security subscription

A security subscription to protect against phishing and malware is also available and can be purchased to provide additional security. Whether your business provides guests with Wi-Fi or runs a corporate network, or protects devices at the point of sale, Meraki Go will make sure your network is both secure and user-friendly.

#### Meraki Go - the most important features

- Visitor information through location analysis
- Customizing the welcome page, blocking page access for a specific Wi-Fi or for all connected devices redirected by the Security Gateway
- Remote port switching on and off
- Website creation - Wi-Fi for guests
- In-app support
- Simple safety configuration

## **Welcome pages and location analysis for all, not just for large networks**

- Welcome page: welcome guests with a custom message with your trademark and landing pages
- Location analysis: location analysis can provide a competitive advantage through the use of guest information, helping you make business decisions about staff, inventory, offers, promotions and loyalty programs
- Messages and personalized advertisements for potential customers encountering your company are more likely to be converted
- Capture consumer data of consumers who frequently visit competitors' websites
- Monitor seasonal traffic and peak hours to forecast traffic and manage stocks and staff
