Full product description

Cisco Meraki Go Security Gateway

Cisco Meraki Go Security Gateway is a powerful router that provides control over network usage restrictions and access to websites. It's a real "firewall" that guarantees security on the network for your devices.

Meraki Go Security Gateway features

- Combination **Firewall & Router** - **Blocking websites**, prioritizing bandwidth and setting limits for use throughout the network - **1 PoE** port and 3 additional LAN ports - Cloud managed by mobile application **Meraki Go** - Updates and technical support

Cisco Meraki Go GX20-HW-EU Security Gateway

Meraki Go is a complete network solution - simple, mobile and secure. Thanks to products managed through **Meraki Go Mobile App** you can set up your network in a few minutes, manage networks Wi-Fi and Ethernet, configure and update security, update software (firmware) and monitor network status. Enjoy all these capabilities in the cloud **without subscription fees**.

. The mobile application gives you in-app technical support. Manage access points by adjusting bandwidth to stream video or download files. Block out malicious websites by separating Wi-Fi from specific business tasks. Meraki Go and Security Gateway network switches make it easy and secure to use Ethernet. Advanced settings, such as guest Wi-Fi, location and splash pages, require only a few clicks in the application. There is also a **subscription of security** to protect against phishing and malware that can be purchased to provide additional security. Whether your company provides guests with Wi-Fi or runs a corporate network, or protects devices at the point of sale, Meraki Go will make sure your network is both secure and user-friendly.

Key features of Meraki Go products

- Customizing the welcome page, blocking page access for a specific Wi-Fi or for all connected devices redirected by the Security Gateway
- Visitor information through location analysis
- Remote port switching on and off
- Website creation - Wi-Fi for guests
- In-app support
- Simple safety configuration

Welcome pages and location analysis

- Welcome page - welcome guests with a custom message with your trademark and landing pages
- Location analysis - can provide a competitive advantage through the use of guest information, help you make business decisions about staff, inventory, offers, promotions and loyalty programs
- Personalised messages and advertisements for potential customers who come across your business are more likely to convert
- Capture consumer data of consumers who frequently visit competitors' websites
- Monitor seasonal traffic and peak hours to forecast traffic and manage stocks and staff
