Price: **315.73 zł** gross / 256.69 zł net

Manufacturer: CISCO

Referention number: DNXEDMIMDRMLLO

Product features

Height	38.5 mm
Output voltage	12 V
Width	130 mm
Depth	200 mm
Input current	1 A
Product weight	600 g

Full product description

Cisco RV042G 2x Gigabit WAN VPN Router - highly secure and reliable network connection for small businesses

The **Cisco® RV042G** Dual WAN VPN router guarantees a simple, affordable and highly secure business-class Internet connection for small businesses, home offices or remote employees.

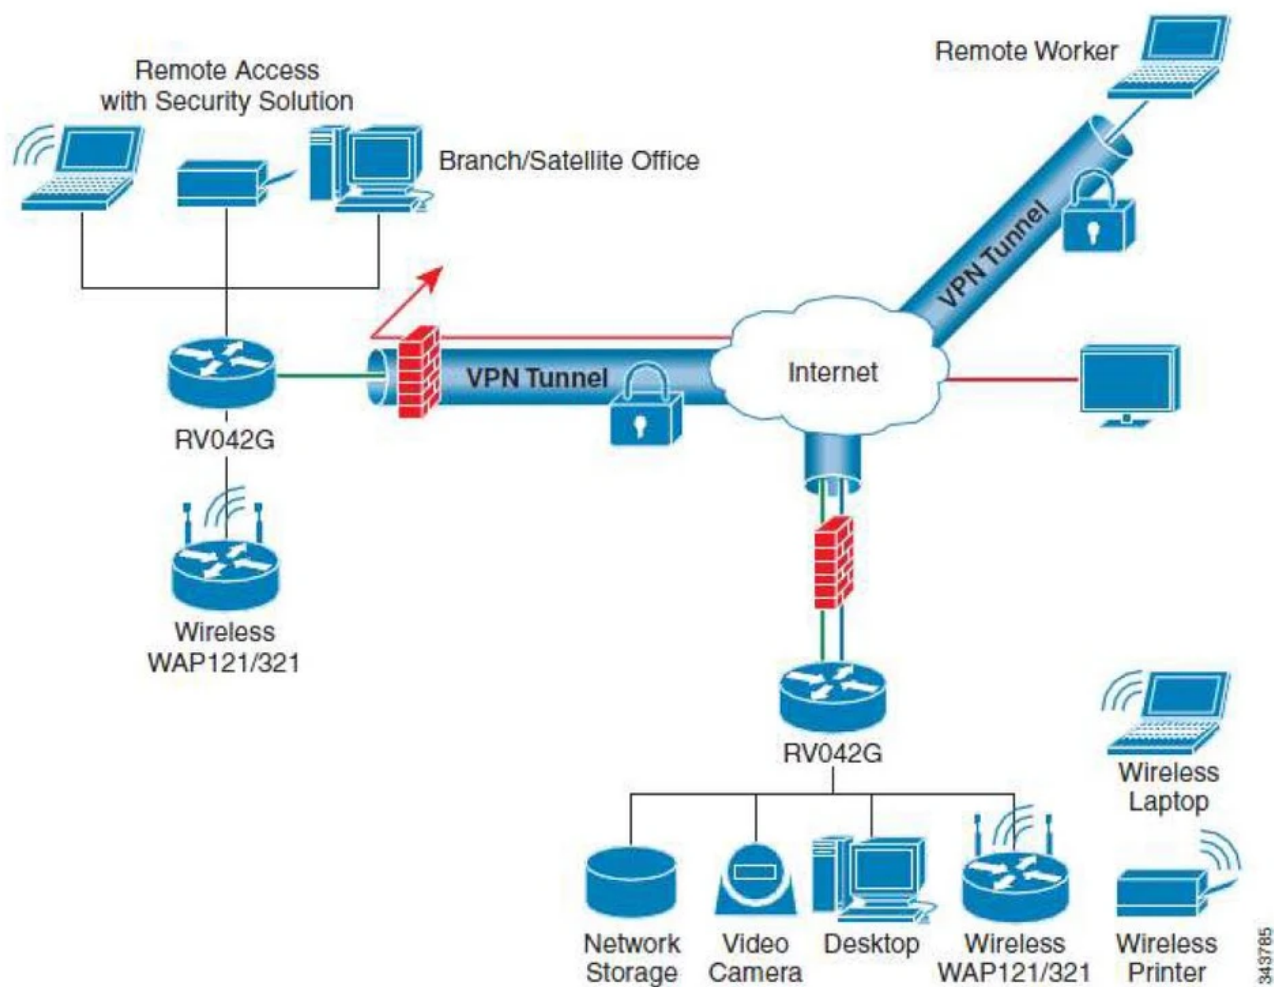

The **Cisco RV042G** router enables two WAN connections, which means that with one service provider it balances the load to improve network performance, and with different providers it supports network continuity. The High Capacity Virtual Private Network (VPN) features ensure that multiple offices and dozens of employees can access the information they need from anywhere, with the level of security that they would have if they were working at headquarters.

High level of safety and easy configuration

To further secure your network and data, the Cisco RV042G uses business-class security features and optional Internet filtering in the cloud. Configuration is easy with an intuitive, browser-based device manager and configuration wizards.

Typical configuration:

343785

Main features

- Two Gigabit Ethernet WAN ports for load balancing and/or network continuity
- Built-in 4-port Gigabit Ethernet switch
- Security - reliable firewall (SPI) and hardware encryption
- High-performance VPN IP security features (IPsec)
- Intuitive, browser-based device manager and configuration wizards
