Full product description

Cisco RV345P - the router made for small businesses

Small businesses are constantly exposed to online threats. The **Cisco Rv345P Dual WAN** Gigabit VPN Router connects small businesses to the **Internet** and protects employees from unwanted content and malicious websites **without compromising the online experience**. The routers help increase employee productivity and overall **network efficiency** by limiting Internet surfing to appropriate site categories and eliminating unwanted network traffic.

Good protection on the Internet

Users are automatically protected from malicious or hacked websites, regardless of site categorization. **End devices and applications** can be identified and processed according to user-defined policies to improve **performance and optimize** network usage.

Features and benefits

- 2 WAN ports (RJ-45) enable load balancing and fault tolerance
- 16 LAN ports (8 * PoE+) provide a small device size with enough ports
- 2 USB ports support 3G/4G modem or flash drive
- Flexible VPN functionality for secure connections
- Support for Cisco AnyConnect® Secure Mobility Client, ideal for remote access via mobile devices
- Dynamic web filtering helps improve the Company's performance and security when connecting to the Internet
- Identification of clients and applications enables Internet access policies for end devices and Internet applications to ensure performance and security
