Full product description

Cisco SF350-24 - 24-port Smart Fast Ethernet switch - 350 series

The SF350-24 switch is equipped with **24 RJ45 ports with 100 Mb/s**, 2 Gigabit Combo ports (RJ45/SFP) and 2 SFP fiber optic ports (1 Gb/s). The device is managed and configured using, among others, a graphic Web interface and a CLI text console.

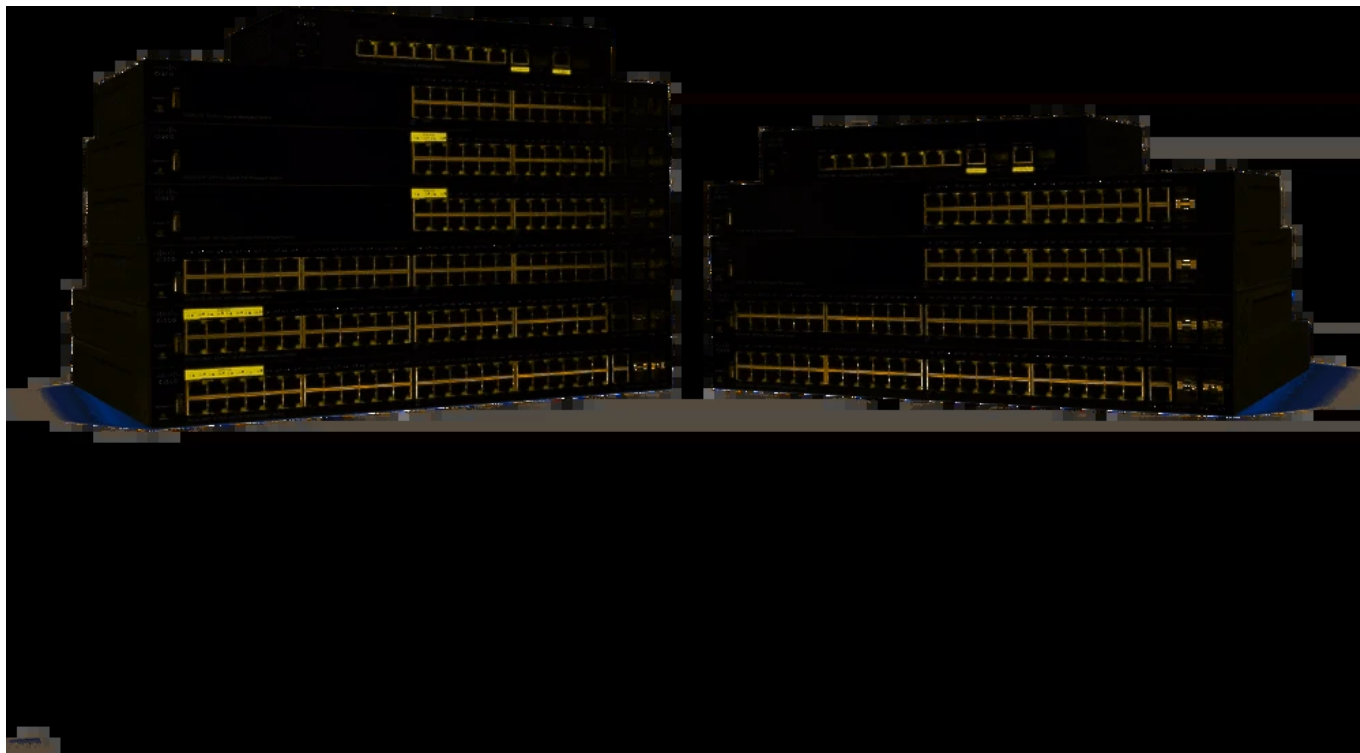

High performance and failure-free

The switch has a throughput of **9.52 million packets per second (64-byte packets)** and a switching capacity of **12.8 Gb/s**. The Cisco switch comes with a limited, lifetime manufacturer's warranty.

Cisco Switches - 350 series

The Cisco 350 series is part of the network solutions included in **Cisco Small Business**. It is a line of attractively priced managed switches, which are the base for business networks. They provide information in a more efficient way, provide features that improve the availability of business applications, protect confidential data and optimize network capacity. Easy to set up and use, the affordable Cisco 350 series enhances capabilities and helps create more efficient computer networks, especially for small businesses.

Cisco 350 Series is a wide range of manageable Ethernet switches. The models in this series are equipped with **from 8 to 48 Fast Ethernet ports and from 10 to 52 Gigabit Ethernet ports**. They provide companies with the optimum flexibility they need to build a solid network foundation. **The Cisco 350 series of Cisco Switches** support advanced security management and network functions for sensitive business data. They are easy to deploy and configure, so there are no difficulties in using the network services needed in any business.

Business applications for Cisco devices

Whether you are building a basic high-performance network to connect employees' computers, or you need a solution to deliver data, voice and video services, the Cisco 350 series of switches will meet all of these needs, and the features of possible deployment scenarios are:

- Secure wireless connectivity - With advanced security features, Power over Ethernet, Auto Smartports, QoS, VLAN, and access control, the Cisco 350 Series switches are the perfect foundation for building a business-class wireless network.
- Unified communication - As a managed network solution, the Cisco 350 series provides performance and advanced traffic management technology when delivering communication and data over a single network. Cisco offers a full range of IP telephony and other unified communications products for the enterprise. The Cisco 350 series switches have been rigorously tested to ensure easy integration and full compatibility with multiple products to provide comprehensive business solutions.
- Highly secure guest connectivity - The Cisco 350 Series allows you to extend secure guest connectivity in a variety of configurations, such as a hotel, office waiting room or other open area for unattended users. With powerful but easy-to-configure security features and traffic segmentation, you can isolate business traffic from guest services and keep your network sessions private.
- Securely connect computers - Cisco 350 Series switches can easily and securely connect small office staff, all servers, printers and other devices used by employees. High performance and reliable connectivity help speed up file transfer and data processing, increasing uptime on the network and maintaining constant contact between employees.
