Full product description

Cisco SF352-08MP - 8-port PoE Fast Ethernet switch - 350 series

The SF352-08MP switch is equipped with **8 RJ45 ports with 100 Mb/s throughput and PoE support**. and 2 ports **Gigabit Combo (RJ45/SFP)**. To manage and configure the device are used, among others, **Graphical Web interface and CLI** text console.

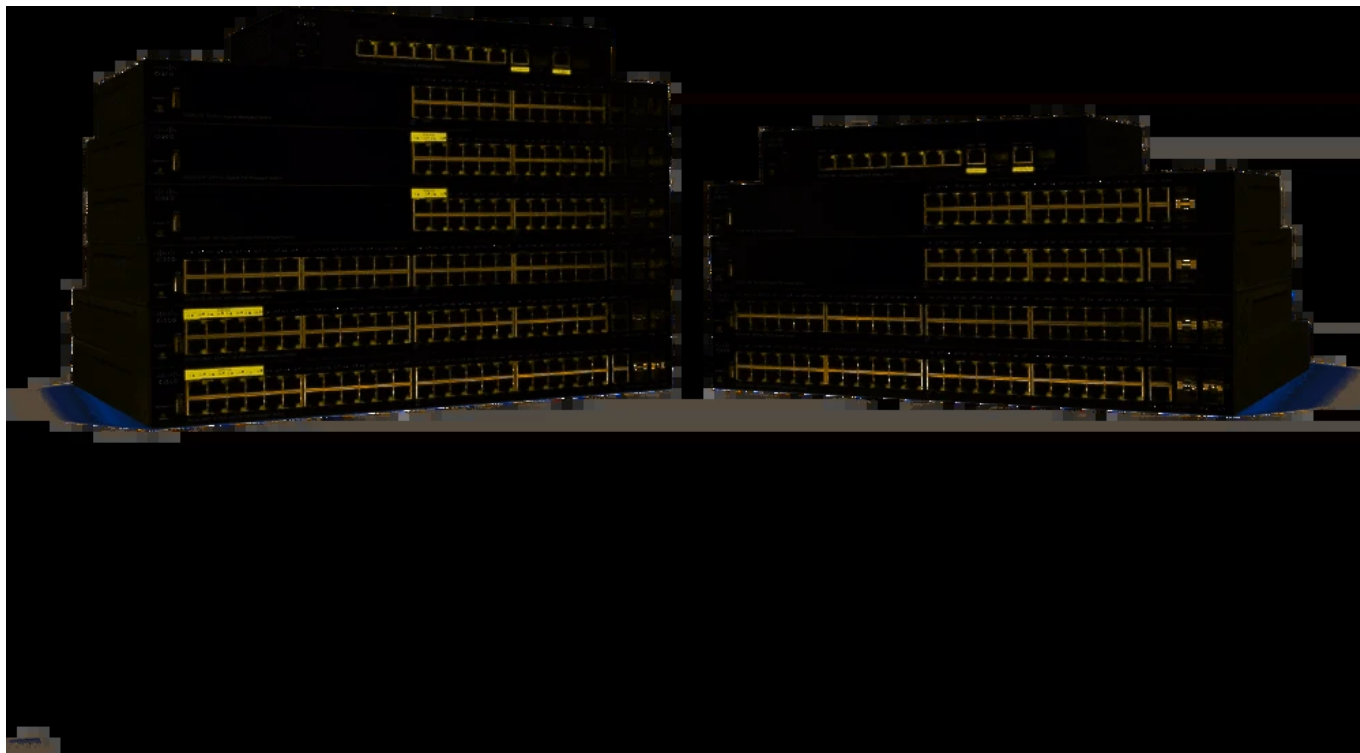

High performance and failure-free

The switch has a throughput of **4.17 million packets per second (64-byte packets)** and a switching capacity of **5.6 Gb/s**. Presented model has 8 ports with PoE power supply, and the total power budget **PoE is 128 W**. The Cisco switch comes with a limited, lifetime manufacturer's warranty.

Cisco Switches 350 series

The Cisco 350 series is part of the network solutions included in **Cisco Small Business**. It is a line of attractively priced managed switches, which are the base for business networks. They provide information in a more efficient way, provide features that improve the availability of business applications, protect confidential data and optimize network capacity. Easy to set up and use, the affordable Cisco 350 series enhances capabilities and helps you create more efficient computer networks, especially for small businesses for which it is dedicated.

Cisco 350 Series is a wide range of manageable Ethernet switches. The models in this series are equipped with The range from 8 to 48 Fast Ethernet ports and 10 to 52 Gigabit Ethernet ports, which guarantees companies the optimum flexibility needed to build a solid network foundation. **The Cisco 350 series of switches** support advanced security management and network functions for sensitive business data. They are easy to deploy and configure, so there are no difficulties in using the network services needed in any business.

Business applications for Cisco devices

Whether you are building a basic high-performance network to connect employees' computers, or you need a solution to deliver data, voice and video services, the Cisco 350 series of switches will meet all of these needs, and the features of possible deployment scenarios are:

- Secure wireless connectivity - With advanced security features, Power over Ethernet, Auto Smartports, QoS, VLAN, and access control, the Cisco 350 Series switches are the perfect foundation for building a business-class wireless network.
- Unified communication - As a managed network solution, the Cisco 350 series provides performance and advanced traffic management technology when delivering communication and data over a single network. Cisco offers a full range of IP telephony and other unified communications products for the enterprise. The Cisco 350 series switches have been rigorously tested to ensure easy integration and full compatibility with multiple products to provide comprehensive business solutions.
- Highly secure guest connectivity - The Cisco 350 Series allows you to extend secure guest connectivity in a variety of configurations, such as a hotel, office waiting room or other open area for unattended users. With powerful but easy-to-configure security features and traffic segmentation, you can isolate business traffic from guest services and keep your network sessions private.
- Securely connect computers - Cisco 350 Series switches can easily and securely connect small office staff, all servers, printers and other devices used by employees. High performance and reliable connectivity help speed up file transfers and data processing, increasing uptime on the network and ensuring that employees stay connected.
