Price: **1,331.03 zł** gross / 1,082.14 zł net

Manufacturer: CISCO

Referention number: DNXGFOMNHRMMLQ

Product features

Regulatory Approvals	UL (UL 60950), CSA (CSA 22.2), CE, FCC 15 (CFR 47)
Storage relative humidity (H-H)	10 - 90%
Height	44 mm
Width	440 mm
Depth	257 mm
Security algorithms	802.1x RADIUS
Mean time between failures (MTBF)	396687 h
Virtual LAN features	Port-based VLAN
Packet buffer memory	12 MB
Storage temperature (T-T)	-20 to 70 °C
Cables included	AC
Mounting brackets included	Yes
Rate limiting	Yes
Power consumption (typical)	35.7 W
Humidity measurement range	10 - 90%
Switching capacity	56 Gb/s
Quick start guide	Yes
Networking standards	IEEE 802.1D
Switch type	Managed
10G support	No
BPDU filtering/protection	Yes
Authentication	Guest VLAN

Access Control List (ACL) rules	512
ARP inspection	Yes
Cable length detection	Yes
SSH/SSL support	Yes
Flash memory	256 MB
Number of VLANs	4096
Spanning tree protocol	Yes
Head-of-line (HOL) blocking	Yes
Broadcast storm control	Yes
Operating temperature (T-T)	0 - 50 °C
Heat dissipation	897.4 British thermal unit per hour
Quality of Service (QoS) support	Yes
VLAN support	Yes
Link aggregation	Yes
Total Power over Ethernet (PoE) budget	195 W
Reset button	Yes
Management protocols	SNMP v1/2c/3, HTTP/HTTPS, MIB, RMON, IPv4/IPv6
Firmware upgradeable	Yes
IGMP snooping	Yes
Processor frequency	800 MHz
Web-based management	Yes
Flow control support	Yes
Port mirroring	Yes
Noise level	53.7 decibel
Jumbo frames	9216
Jumbo frames support	Yes
MAC address table	16384 entries
Power over Ethernet (PoE) ports quantity	24
Power over Ethernet (PoE)	Yes
Internal memory	512 MB
Combo SFP ports quantity	2
Number of IP interfaces	128
SFP module slots quantity	2
Number of static routes	512
AC input frequency	50 Hz
Number of queues	8
AC input voltage	110 V
DHCP features	DHCP client
Built-in processor	Yes
Number of multicast groups filtered	1000
Product colour	Black
Switch layer	L3+
IP-MAC-Port binding	Yes
Access Control List (ACL)	Yes
MAC address filtering	Yes
Multicast support	Yes
Basic switching RJ-45 Ethernet ports type	Gigabit Ethernet (10/100/1000)

Basic switching RJ-45 Ethernet ports quantity 24

Product weight 3830 g

Full product description

Cisco SG350-28P - 28-port PoE Gigabit Ethernet switch - 350 series

The **SG350-28P** switch is equipped with **24 RJ45 ports with a throughput of 1000 Mb/s with PoE support, 2 Gigabit Combo (RJ45/SFP) and 2 SFP (1 Gb/s)** ports. To manage and configure the device are used, among others, **Graphical Web interface and CLI** text console.

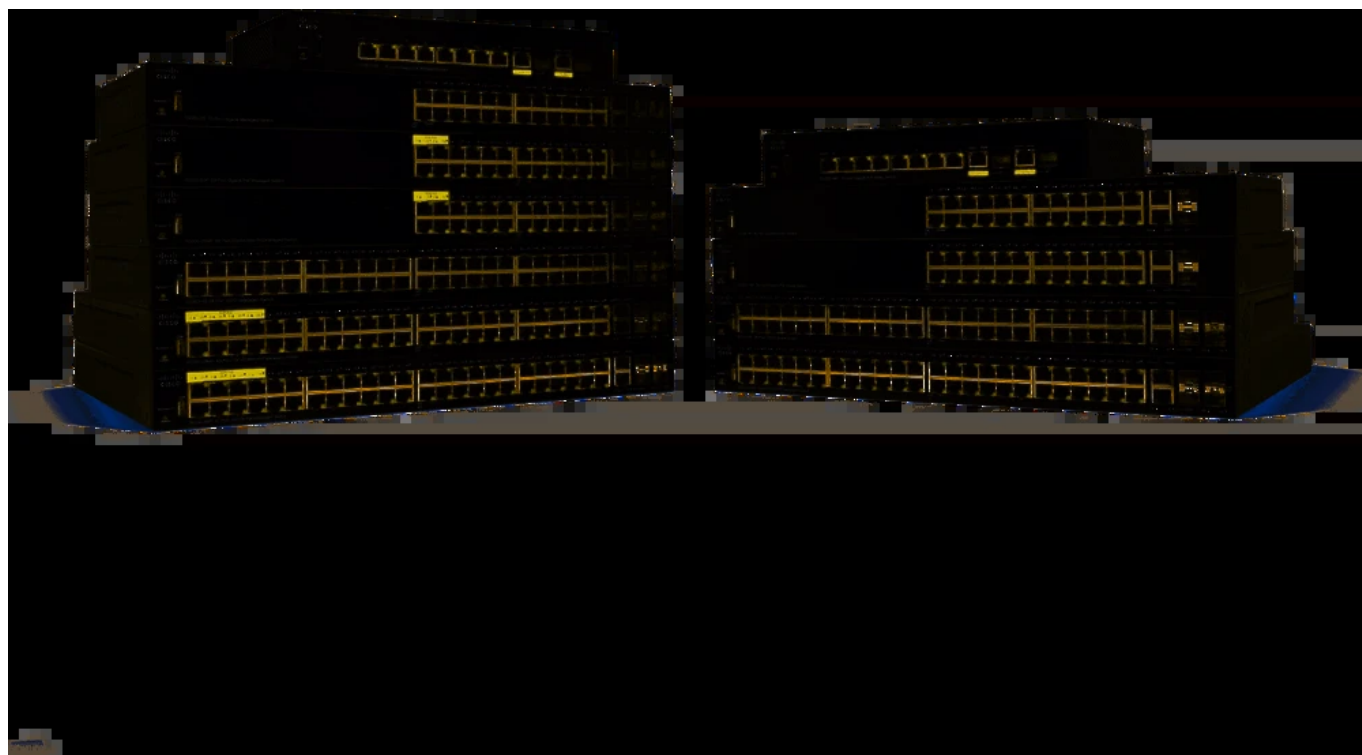

High performance and reliability of the Cisco brand

The switch has a throughput of **41.66 million packets per second (64-byte packets)** and a switching capacity of **56.0 Gb/s**. The presented model is equipped with **24 ports with PoE** power supply, and the total power budget **PoE is 195 W**. The Cisco switch comes with a limited, lifetime manufacturer's warranty.

Cisco Switches - 350 series

The Cisco 350 series is part of the network solutions included in **Cisco Small Business**. It is a line of attractively priced managed switches, which are the base for business networks. They provide information in a more efficient way, provide features that improve the availability of business applications, protect confidential data and optimize network capacity. Easy to set up and use, the affordable Cisco 350 series enhances capabilities and helps you create more efficient computer networks, especially for small businesses for which it is dedicated.

Cisco 350 Series is a wide range of manageable Ethernet switches. The models in this series are equipped with The range from 8 to 48 Fast Ethernet ports and 10 to 52 Gigabit Ethernet ports, which guarantees companies the optimum flexibility needed to build a solid network foundation. **The Cisco 350 series of switches** support advanced security management and network functions for sensitive business data. They are easy to deploy and configure, so there are no difficulties in using the network services needed in any business.

Business applications for Cisco devices

Whether you are building a basic high-performance network to connect employees' computers, or you need a solution to deliver data, voice and video services, the Cisco 350 series of switches will meet all of these needs, and the features of possible deployment scenarios are:

- Secure wireless connectivity - With advanced security features, Power over Ethernet, Auto Smartports, QoS, VLAN, and access control, the Cisco 350 Series switches are the perfect foundation for building a business-class wireless network.
- Unified communication - As a managed network solution, the Cisco 350 series provides performance and advanced traffic management technology when delivering communication and data over a single network. Cisco offers a full range of IP telephony and other unified communications products for the enterprise. The Cisco 350 series switches have been rigorously tested to ensure easy integration and full compatibility with multiple products to provide comprehensive business solutions.
- Highly secure guest connectivity - The Cisco 350 Series allows you to extend secure guest connectivity in a variety of configurations, such as a hotel, office waiting room or other open area for unattended users. With powerful but easy-to-configure security features and

traffic segmentation, you can isolate business traffic from guest services and keep your network sessions private.

- Securely connect computers - Cisco 350 Series switches can easily and securely connect small office staff, all servers, printers and other devices used by employees. High performance and reliable connectivity help speed up file transfers and data processing, increasing uptime on the network and ensuring that employees stay connected.
