Price: **60.74 zł** gross / 49.38 zł net

Manufacturer: EXTRALINK

Referention number: DNXGJOKNLRMNGI

Information:

A robust floor pump with a pressure gauge for precise and quick inflation of bicycle, car and motorcycle tyres, as well as balls, mattresses and other accessories. Equipped with a metal cylinder, reinforced piston, ergonomic handle and non-slip base, it ensures durability, stability and ease of use. The clear pressure gauge allows real-time pressure monitoring, helping to avoid over- or under-inflation. The dual head fits Presta, Schrader and Dunlop valves without adapters, while the maximum pressure of 160 PSI and the flexible hose with locking mechanism guarantee efficient and airtight inflation.

Full product description

Versatility of the floor pump with pressure gauge

Floor pump with pressure gauge is a **solid** and **efficient** device that ensures **precise inflation** of bicycle, car and motorcycle tyres, as well as balls, mattresses and other accessories. Thanks to its high working pressure and **clear gauge**, it is indispensable both in home workshops and on trips, providing convenience and **precision** in every situation.

High-quality workmanship

Pump with pressure gauge features a **metal cylinder** and a **reinforced piston**, which guarantees its **durability** and **resistance** to intensive use. In addition, the **ergonomic handle** ensures comfort while pumping, and the **non-slip base** keeps the device stable even at high pressure, enabling **safe** operation in all conditions.

Precise pressure measurement

The built-in **pressure gauge** allows **real-time pressure monitoring**, ensuring **accuracy** and **safety** during inflation. This helps you avoid overinflating or underinflating the tyre, which affects the **durability** of the equipment and the **comfort** of use.

Versatile application

Thanks to the **dual head**, the pump is compatible with **three types of valves** – Presta, Schrader and Dunlop – without the need for adapters. It is an **ideal solution** for cyclists, drivers, motorcyclists, as well as for people who often use balls, mattresses or other inflatable accessories, guaranteeing **versatility** in one device.

Convenient and quick operation

Floor pump with pressure gauge is a device that combines **high efficiency** and **fast operation**. Thanks to its design, which allows a **maximum pressure** of up to **160 PSI**, pumping becomes easy and effective. The **flexible hose** with a locking system ensures a **secure and airtight connection** to the valve, preventing air loss, which guarantees **quick and hassle-free** use.
