Price: **133.64 zł** gross / 108.65 zł net

Manufacturer: EXTRALINK

Referention number: DNXXGHISJRMMMK

Information:

The Extralink 24293 laser level emits clear green horizontal and vertical lines, making it easy to set out precise right angles during installation, tiling and renovation work. A range of up to 25 m is suitable for both small and larger rooms, and the 360° rotating base makes it easy to direct the beam without moving the device. The compensator lock protects the mechanism during transport. The compact, lightweight design made from durable materials and the included case ensure convenient use and carrying. Powered by 2 AA batteries, it provides 8–12 hours of operation.

Full product description

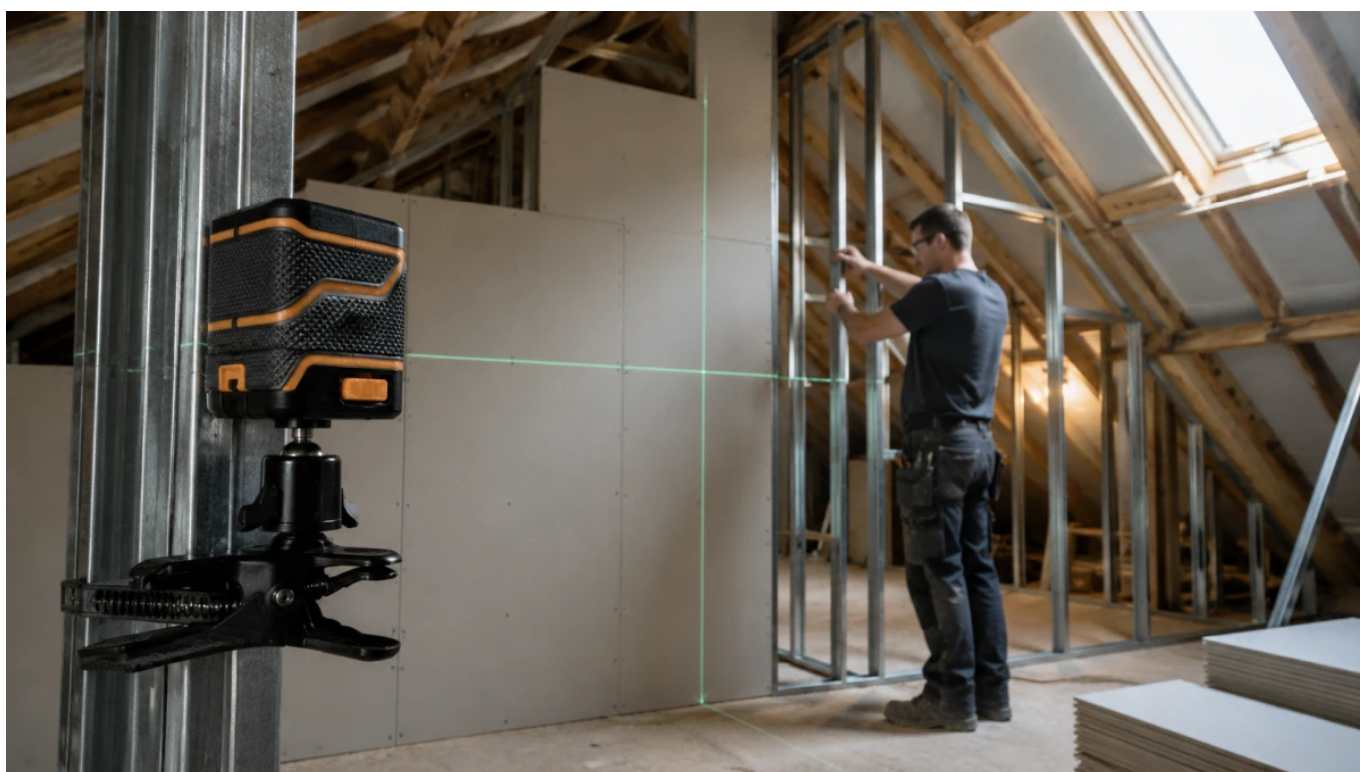

Clear laser lines

The Extralink 24293 laser level displays green horizontal and vertical lines, making it easier to mark right angles when installing shelves, laying tiles and carrying out other renovation work. A working range of up to 25 m means the device can be used in both smaller and larger rooms.

360° rotating base

The 360° rotating mechanism allows the beam to be conveniently directed to the desired spot without the need to constantly reposition the device. The compensator lock helps secure the level's mechanism during transport and storage.

Compact design

The housing is made from ABS, TPE and stainless steel components. Dimensions of 6.2 × 7 × 8.1 cm and a weight of 470 g make the level handy, easy to position and convenient to carry. The included case helps protect the device during storage.

Up to 12 hours of operation

Powered by two AA batteries, it offers 8 to 12 hours of operation. Batteries are not included. An operating temperature range from -10°C to +50°C allows the level to be used during various installation and renovation tasks.
