Price: **269.00 zł** gross / 218.70 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGKJRKRMMNP

Product features

Charging source	DC
Height	266 mm
Output voltage	5 V
Width	139 mm
Depth	82 mm
FM band range	87 MHz
Supported radio bands	FM
Fast charging	No
Battery capacity	6000 mAh
Battery voltage	3.7 V
Built-in flashlight	Yes
Charger compatibility	Universal
On/off switch	Yes
Cordless recharging	No
Output current	2.4 A
Built-in radio	Yes
Number of built-in speakers	1
Built-in speaker(s)	Yes
Input interface	USB Type-C

Port 1 output power	12 W
Battery technology	Lithium-Ion (Li-Ion)
Product colour	Black
Speaker type	1-way
Number of simultaneously connected devices (max)	2
Built-in display	No
Watch case material	Acrylonitrile butadiene styrene (ABS)
Product weight	680 g

Full product description

Dynamo radio - your reliable emergency device

Life is unpredictable, but that doesn't mean you can't be prepared. With the **Extralink Power Ranger EPS-6000 with built-in dynamo and solar panel**, you'll be ready for whatever life throws your way. Whether you're camping, hiking or stuck on the side of the highway with a dead phone battery, the EPS-6000 will come to the rescue. The integrated **6,000 mAh powerbank** provides enough power to make crucial calls to family, emergency services or insurance. And with **an LED flashlight**, you can easily illuminate the darkness, whether you're camping or dealing with a power outage.

Torch, Radio, Powerbank and SOS

Your support in a crisis

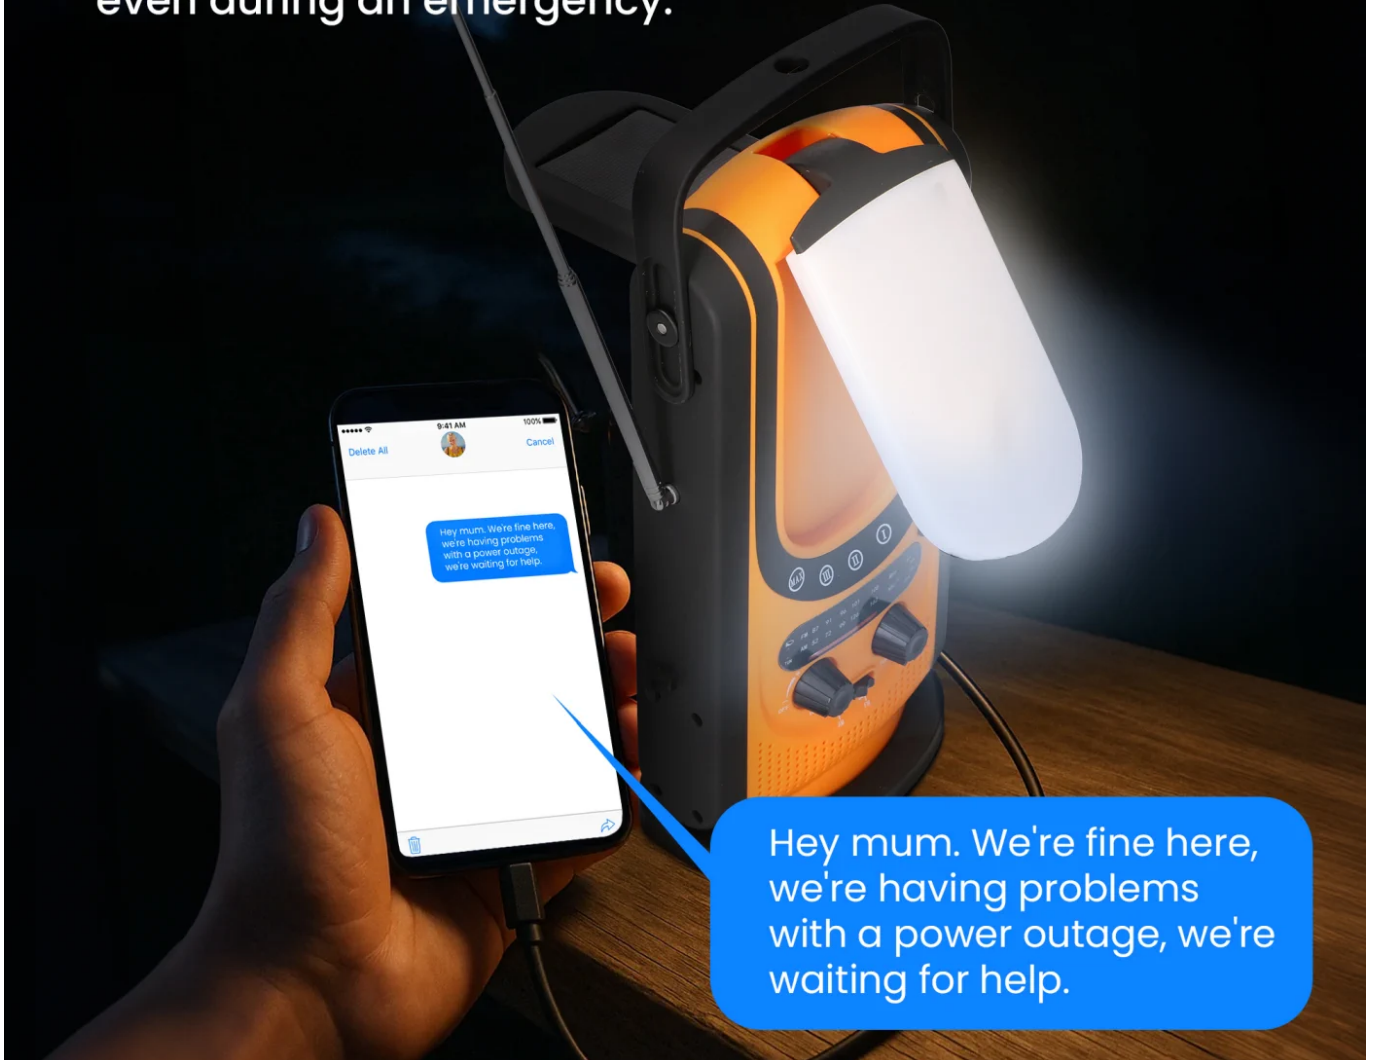

Ideal for power failures and emergencies

Key features of Extralink Power Ranger EPS-6000

6000mAh Powerbank – Energy when you need it most.

Stay connected to your loved ones
even during an emergency.

Versatile charging options

Our solar emergency radio with powerbank offers **four different charging methods**. Under normal conditions, you can use the included **USB Type-C** cable for convenient charging. In the event of a power outage or other emergencies, you can use the **hand crank generator** for manual charging, **solar** power for green charging, or **insert AAA batteries** (not included). The diverse range of charging methods ensures that you will never be left without power. In addition, **the radio can act as a powerbank**, so that essential devices such as cell phones will always be in working order.

Uninterruptible power supply – 4 ways to charge

Emergency lighting and SOS alarm system

Designed with both practicality and peace of mind in mind, the **Extralink Power Ranger EPS-6000** comes with an **integrated reading light**, offering an invaluable source of light during power outages or in poorly lit areas. What's more, the built-in SOS alarm can help in emergency situations - whether you're lost in the wilderness or find yourself in an emergency situation at home. It is an **essential tool for camping, backpacking or survival**.

**RELIABLE SUPPORT IN EVERY SITUATION –
FOR THE WHOLE FAMILY AND EVERY TRIP**

Multifunctionality and reliability

This device is more than a simple powerbank - it has a number of features to help you in emergency situations. Tune in to multiple FM channels, use the extended antenna for better signal stability, or use the high-capacity 6,000 mAh powerbank for emergency power. With its rugged design, compact size, bright flashlight and clear speaker, the Extralink Power Ranger EPS-6000 will support you in any situation.

SOS ALARM

Who is it aimed at?

This compact and versatile radio with a built-in dynamo and solar panel is not just a gadget - it's a practical survival tool, designed with you in mind:

- **Preppers and survival enthusiasts** - who value independence, SOS functions, flashlight and powerbank in one device.
- **Hikers and outdoor enthusiasts** - needing a reliable source of energy and information away from civilization.
- **People prepared for power failures** - especially those living in regions prone to power outages.

Why have a radio with a dynamo and solar panel?

- **Increases security:** You don't have to worry about a dead battery - just a moment's cranking or access to sunlight can give you precious minutes of operation. That's independence from the electric grid when you need it most.
- **You always have access to power:** As many as four ways to power: dynamo, solar panel, USB port and AAA batteries. At home, in the mountains, in the woods - you'll always find a way to charge your radio and phone.
- **Indispensable in the field:** Perfect for active outdoorsmen, bushcraft enthusiasts, or those who want to be prepared for any eventuality. Several devices in one means saving space and weight in your backpack.
- **Flashlight and powerbank in one:** Instead of carrying a radio, flashlight and powerbank separately, you have everything in one lightweight and practical device. Less equipment means less worry.
- **Constant access to information:** When the internet, TV and cellular network fail - the radio still works, providing emergency service messages and weather forecasts.
