Full product description

Dell S2721HGF

Explore new worlds on a large **27-inch Full HD display** that delivers incredible brightness for immersive gameplay. With a curved screen with a 1500R radius of curvature, the field of view brings you closer to reality, creating an amazing, immersive experience.

Smooth play without interference

With an impressive 144Hz refresh rate, even fast-moving objects on the screen appear incredibly sharp. **NVIDIA G-SYNC and AMD FreeSync Premium technologies** minimize graphics distortions such as line shifts and stuttering, so you can enjoy smooth gameplay with ultra-high visual quality images.

Unique design

The **new unique design**, developed specifically for gamers, is more expressive and provides gamers with functional and aesthetic benefits. Vents on the back of the monitor improve heat dissipation. A new joystick and shortcut buttons on the back of the monitor provide easy operation of the on-screen menu.

Reduced eye fatigue.

Three custom profiles offer even more personalization options. A timer, frame counter and darkness stabilizer let you control everything from frame rate to brightness and shadows. Constant **current brightness control** eliminates screen flicker, enhancing viewing comfort. **ComfortView technology** reduces harmful blue glow, significantly reducing eye fatigue.
