Full product description

Dell S3222DGM monitor

The **Dell S3222DGM** is a gaming monitor with a 31.5-inch curved screen and high QHD resolution. The **refresh rate is 144 Hz and the MPRT is 1 ms**, ensuring smooth gaming with full immersion. The monitor combines enough technology and features that you'll need for a variety of tasks as well as gaming. With the available VESA mount, it can be hung on the wall, which can significantly save space in the room.

See every detail

The **Dell S3222DGM** is a 31.5-inch QHD display that offers 77% more screen content than Full HD. **The 1800R curved screen** with a 3-sided narrow bezel provides a truly immersive gaming experience by expanding the field of view, reducing distortion, glare and reflections.

Full spectrum

VA panel technology provides a high contrast ratio of 3000:1 for deeper blacks and brighter whites. Along with an sRGB color gamut of 99%, colors are extremely bright, and **Comfort View** software reduces harmful blue light to help reduce eye fatigue during your next marathon gaming session.

Outstanding transparency

Stay in the heat of battle with fast, responsive and jam-free gameplay with **AMD FreeSync™ Premium** technology. The **165 Hz** refresh rate allows you to view fast-moving images with incredible clarity, resulting in faster response times, meaning you'll always stay ahead of the competition.

Customizable comfort

A new slim, tapered base with convenient height and tilt adjustment and vents on the back of the monitor are designed **for long-lasting comfort**. With three custom profiles that offer even more customization options: **a timer, FPS counter and darkness stabilizer** let you control everything from frame rate to brightness and shadow control.
