Full product description

DELL D3100 DOCKING STATION, USB - HDMI, USB, DP, RJ-45 (452-BBOT)

Whether you work from home or your business. A **docking station** is the solution for anyone who wants to take their productivity to the next level. You can connect multiple devices in one place and have access to almost everything you need to work.

Work on multiple monitors

The multi-function station allows you to connect your laptop with three monitors and other devices like printers or external drives that you will need while working. You do all this with just **one cable**. It enhances the capabilities of laptops and allows you to customize your work environment. The station is small, so it will not take up much space. and you will have everything under control.

Watch movies in 4K Ultra HD resolution

The station allows you to connect one **4K Ultra HD** and two **Full HD** monitors. This works perfectly if you are about to give a presentation or present detailed images. In addition, there is also a **headphone jack** on the back of the unit, which will come in handy when you want to test a clip without disturbing others. You will also find an **audio output** on the back of the station to connect speakers for a larger audience.
