Full product description

DELL LATITUDE 3510 LAPTOP I3-10110U/8GB/256GBSSD/15.6"

Extremely practical business laptop from **Latitude series by DELL**. Ideal for office work and travel. The design is so slim that during a business trip you will not feel its weight, and thanks to security features you do not have to worry about unauthorized access to it. The **diagonal of 15.6 inches** is quite enough to prepare documents or work in the necessary programs. In moments of relaxation you can also easily watch HD movies.

Take a look at the processor and memory capacity

The dual-core **Intel Core i3-10110U** processor with **4 MB** cache (**4 threads, 2.10-4.10 GHz**) handles most of the necessary administrative - office programs very well. With a **256GB SSD** and **8GB DDR4 RAM** you will be able to do much more than you thought. You'll be able to accommodate a fair amount of data, and you have the option to expand the memory up to **32 GB** if needed.

Experience color depth with high resolution

Matte screen will spare you the unpleasant glare, and the **resolution of Full HD 1920 x 1080** and **IPS matrix** will allow you to enjoy the depth of colors in every scene of the watched movie, also preparing a presentation with fine details will stop being a problem. The **Intel UHD**

Graphics card can handle basic graphics programs, allowing to complement the documents with the required graphics.

Secured in several ways

If you're wondering if you're going to lose data, cross that problem off your list. **TPM encryption** allows you to encrypt your drives with **BitLocker**. With such security, you can protect your system even if you change hard drives or BIOS settings. And when you're on the go, the **Noble Wedge port** is a great way to secure your laptop with a cord. Even if you temporarily lose your computer, no one will be able to get to it quickly.

Practical in every way

Working in the evening or without the possibility of full light will not be a problem thanks to the **backlit keyboard**. Also, **the numeric keypad** will come in handy if you work in Excel and want to quickly enter data into files. **Built-in speakers** and **two microphones** will prove useful during an online meeting, but also give a good sound quality when watching a webinar or video. The included Windows 10 Pro will allow you to get to work right away after a brief setting of your own preferences.
