Full product description

DELL LATITUDE 5520 LAPTOP I51135G7/8GB/256GB SSD/15.6"/W10PRO

The **DELL Latitude** laptop is a laptop almost for special tasks in the business class. It will not only perform visually, but most importantly as a concrete machine in terms of performance. It comes with **Windows 10 Pro** operating system. The Latitude series is one of the more reliable and secure, so it is worth choosing the **5520 model** with a fast **256 GB SSD** with a **diagonal of 15.6 inches**. The laptop with a quad-core **Intel Core i5** processor, **64-bit** and **8 MB cache** will also do well on the go thanks to its robust security methods for both the laptop and the system itself.

Perfectly roomy for business

The 5520 has **8 GB DDR4, 3200MHz RAM** installed. It can of course be **increased to 64 GB**, we have 2 memory banks here, 1 of which is free. The laptop gains lightness not only on the lack of an optical drive, but also thanks to the **SSD drive**. Its capacity is within the limits of **256 GB**

A screen that gives you a deep experience

Matte **IPS mat**rix coating does not tire the eyes, and **the diagonal of 15.6 inches** will allow you to freely work on the laptop in **Full HD 1920 x 1080** resolution. This model has an integrated **Intel Iris Xe graphics card**. It is twice as efficient as Intel UHD Graphics (its predecessor), which allows you to freely play games or work in a basic graphics program. In addition, **LED technology** allows you to enjoy high quality colors.

Multiple communication options

The laptop easily connects using **WiFi** and **Bluetooth**. In addition to the SSD drive, the DELL Latitude also has a **micro SD 4.0 memory card reader**, **two USB 3.2 connectors**, one of which has PowerShare functionality. **HDMI input** will allow us to connect to a larger screen when displaying presentations or older **RJ45** type cables. As with most laptops, you'll also find a headset jack or a **Wedge Lock cable slot for a compact wedge lock that secures the laptop from theft**. You'll also find **two Thunderbolt™ 4 ports** with Power Delivery and DisplayPort (USB Type-C™) support.

Protected inside and out

The **fingerprint reader** is a great solution when you use your laptop on business trips. No one unwanted can access your files without your permission. In addition, **Noble Lock** is also an anti-theft feature. The 5520 has a slot for **Wedge Lock**, a compact wedge lock that secures your laptop. In addition, the laptop is equipped with a **TPM module**, which makes it possible, among other things, to encrypt drives with **BitLocker**

Elegance in business

The carbon fiber, aluminum, and armored catches used for the chassis give the laptop an extremely designer look, while also giving it a sense of security. The dimensions are optimal for work at **2.2 cm x 35.8 cm x 23.6 cm**, and even when traveling it does not take up much space, while it is quite light at **1.59 kg**.
