Full product description

Dell Vostro 5402 business laptop

The **Dell Vostro 5402 laptop** has a slim, thin design that impresses not only in design, but also in robustness, and has enterprise-class ease of use and security, all in line with both new and legacy technologies. The **Dell Vostro 5402** will be a great fit for all companies looking for affordable hardware that meets modern standards in terms of performance and security.

Excellent security features

Trusted Platform Module 2.0 is a commercial-grade security chip installed on the motherboard that creates and stores passwords and encryption keys. With this chip, you are assured that no one has tampered with your computer before it boots up, and your data is protected from external attacks via malware.

Crystal clear picture and sound

The HD camera is only 2.7mm high, despite its small size, the camera provides high-quality images. With the **Waves MaxxAudio® Pro** package, you won't miss a word. The package includes such advanced studio technologies as efficient noise reduction, reliable echo cancellation, an equalizer that sharpens the sound and its dynamic smoothing functions.
