Full product description

Electric motor-assisted scooter for children

Denver introduces an electric scooter designed especially for children - **model SCK-5310**. With a **100W** motor, this scooter is capable of reaching **speeds of up to 6 km/h**, providing your child with an exciting but safe ride. The electric scooter is a great way to introduce your child to the world of electric transportation, providing a safe and fun activity they will love.

Key features of the Denver SCK-5310 scooter

- 100W electric motor to assist in movement
- Foldable design, easy to carry
- Maximum range up to 6 km
- For children aged 6
- Load capacity up to 50 kg
- Maximum speed up to 6 km/h
- IPX4 splash resistance
- 2000 mAh rechargeable battery

Scooter ideal for short rides

The Denver SCK-5310 scooter has a **range of up to 6 km on a single charge**, making it ideal for short trips around the neighborhood or to a local park. Maximum speed when riding with motor support reaches **6 km/h**. Thanks to its **IPX4 protection rating**, it is protected against splashing water from any direction, so your child can ride it in any weather.

Safety first

Safety is a top priority, which is why the electric scooter has a reliable **brake on the rear wheel** that allows your child to stop quickly and safely when needed. The handlebars are designed with a comfortable grip, so your child can hold on safely while riding. The **height of the handlebars can be adjusted** to fit your child's height. When moving around on the scooter, **just press the button located in the floor** for the electric motor driving assistance to start after a while.
