Information:

DIXIX Pro Shaver DSX8500 is a foil shaver for finishing hairstyles, shaving stubble and trimming short hair, ideal for home use and in a barbershop. Equipped with blades made of Japanese stainless steel, a powerful motor and a double flexible foil, it ensures fast, precise and smooth shaving of the face, neck and contours. The battery provides up to 180 minutes of use after USB charging, and the head can be washed under running water, making cleaning easier. The compact, ergonomic design increases user comfort.

Full product description

Smooth finish

DIXIX Pro Shaver DSX8500 is a foil shaver designed for finishing hairstyles, shaving stubble and evening out short-cropped hair. The ergonomic housing makes it easier to guide the device, so this model is suitable for home grooming as well as work in a barbershop.

Blades made of Japanese steel

The cutting elements made of Japanese stainless steel enable efficient removal of short stubble. The material helps maintain the blades' properties during regular use, supporting an even and smooth finish on the face, neck and hairline contours.

Motor for efficient shaving

The efficient motor ensures smooth blade operation and helps effectively remove short and dense stubble. Stable drive performance allows successive movements without unnecessary pauses, which improves grooming and hairstyle finishing.

Double flexible foil

The double flexible foil adapts to the shape of the face and makes shaving around the chin, neck and jawline easier. The design helps maintain contact between the shaving head and the skin and reduces the need to pass the shaver over the same area repeatedly.

Up to 180 minutes of use

The built-in battery provides up to 180 minutes of operation on a full charge, allowing for many shaving cycles. Charging via USB cable makes it easy to use the device at home, in the salon and while travelling, without the need for a dedicated mains charger.

Easy head maintenance

The shaver head can be rinsed under running water, making it easy to remove hair residue after use. The compact dimensions of 118 x 63 x 36 mm mean the device fits comfortably in the hand, a toiletry bag or a barber kit bag.
