Price: **199.00 zł** gross / 161.79 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGNIKGRMLPO

Information:

The E88 Pro drone is a lightweight and compact model controlled directly from a smartphone via an app, without the need for a traditional remote controller. It offers live image preview, altitude stabilisation, Headless mode, flight along a set route and impressive 360° spins at the press of a button. Three speed levels, take-off and landing with one click, automatic return and LED lights also make it easy for beginners to use. Two cameras let you switch perspective during flight, while three batteries provide up to 45 minutes of flying time in total.

Full product description

E88 PRO Drone - An Excellent Choice for Beginners

The **E88 PRO drone** is an excellent choice for people who are just starting their drone adventure. One of the biggest advantages of this model is its **exceptional flight time, which is up to 15 minutes**. Compared to other models, which usually offer a flight time between 6 and 12 minutes, the **E88 PRO provides 2-3 times more fun in the air**, which sets it apart from the competition.

Strong Battery - More Time for Airborne Evolutions.

The **E88 PRO drone has a robust 1800 mAh battery** that provides longer flight time without the need for frequent charging. Thanks to the **insert-and-use battery**, replacing it with a spare is quick and easy. With no need to connect cables or open special chambers, you can continue flying immediately, which greatly increases the convenience of use.

Folding Arms - Mobility and Practicality

The E88 PRO is designed for convenient carrying and storage. Thanks to its **folding arms**, the drone can be folded quickly and easily, making it **take up less space and more practical for transport**. The whole process of folding and unfolding takes only a few moments, adding to the convenience.

Intuitive Remote Control - Ease of Control for Everyone

The **E88 PRO drone's controller** is designed along the lines of console game pads, making it **extremely intuitive and easy to use**. The remote control is comfortable to use and easy to learn for all users, regardless of their experience. Thanks to the **"take off" auto start button**, starting a flight is quick and easy.

Advanced Features - Full Control and Fun

The E88 PRO is packed with features that maximize your flying pleasure. **Built-in joysticks** allow full control over the drone's movements, and **quick takeoff, landing and return buttons** make it easy to operate. The drone is **equipped with a state-of-the-art camera with FPV transmission**, allowing you to view live video on your smartphone. The **app, available for Android and iOS**, allows you to easily upload photos and videos.

Support for your Smartphone - FPV transmission

The E88 PRO drone's FPV camera allows you to **stream live video directly to your smartphone**. With the app available for Android and iOS, you can watch what the drone sees in real time. **Simply install the app or scan the QR code from the manual** to instantly start viewing live video and enjoy amazing aerial shots.
