Manufacturer: EXTRALINK

Referention number: DNXGFNQOMRMNJL

Product features

Material	Aluminium
Product colour	Aluminium
Type	Cable holder
Designation	Desk/Wall

Full product description

Application

The cable supply enclosure with rack is an ideal solution **for maintaining order** and for the **safe storage of cabling supplies (such as fiber optic cable)**. It is used in both the data communications and telecommunications industries. It is possible to fix the rack to any surface with the help of numerous mounting holes. The housing protects the cable from mechanical damage. Disassembly and assembly of the housing does not cause the slightest problems. The racks guarantee functionality and the correct bending radius of the cable. They are made of high-grade aluminum alloys.
