Price: **390.62 zł** gross / 317.58 zł net

Manufacturer: EXTRALINK

Referention number: DNXXGHONDMMGM

### Information:

The high-quality Extralink replacement battery for Dyson V12 vacuum cleaners restores the device to full working order and extends operating time, enabling convenient cleaning of the whole home without interruptions. The 25.2 V Li-ion cell with a capacity of 2500 mAh provides stable power, effective performance on various surfaces, and motor protection. The BMS protects against overload and short circuit, increasing safety and durability. The ABS and PC housing is resistant to damage, while the precise fit guarantees easy installation. Compatible with V12 Detect Slim, Absolute, Motorhead, Complete and Fluffy models.

### Full product description

### High-quality Extralink replacement

The Extralink replacement battery **restores full performance** to Dyson V12 series vacuum cleaners, providing an efficient alternative to factory components. Thanks to its precise fit, replacing the part is straightforward, and the device regains its **original suction power**. Choosing this solution helps maintain uninterrupted operation without the need to invest in new equipment.

# Nowa moc

**Mocna bateria zamienna ENERGY Extralink**

**Kompatybilna z modelami Dyson:**

V12 Detect Slim,

V12 Detect Slim Absolute,

V12 Detect Slim Motorhead,

V12 Detect Slim Complete,

V12 Detect Slim Fluffy

Nazwa Dyson została użyta wyłącznie w celu określenia kompatybilności produktu marki Extralink.

## Greater efficiency during operation

Using this cell **extends operating time**, allowing the whole home to be cleaned thoroughly without inconvenient breaks. A stable flow of energy supports **effective removal of dirt** from various surfaces, from carpets to hard floors. A properly selected component helps maintain the motor's condition, contributing to the vacuum cleaner's performance for years to come.

# Nowa bateria – nowa moc Twojego odkurzacza

Dłuższy czas  
pracy robota

Pełna moc  
i wydajność

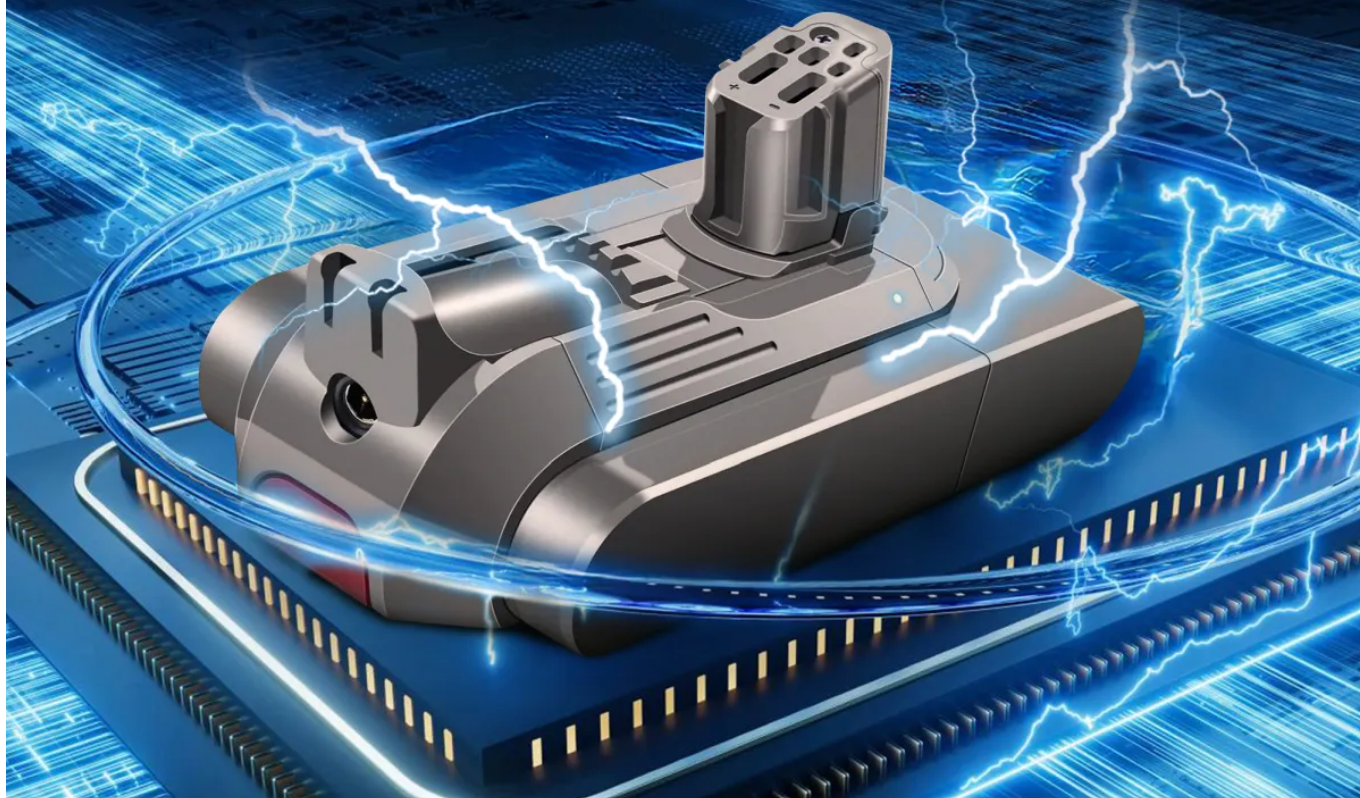

Ochrona przed  
przegrzaniem  
i zwarcie

Stabilna i  
bezpieczna  
praca

Przedłużenie  
życia  
urządzenia

## Parameters that support efficiency

The **Li-ion battery with a capacity of 2500 mAh** and a voltage of 25.2V offers the power reserve needed for intensive cleaning. The use of lithium-ion cells makes the charging process repeatable and stable, which translates into **user comfort**. This technical configuration enables optimal use of your device's potential.

# EXTRA LINK ENERGY

2500  
mAh

Typ akumulatora

## Wide compatibility with the V12 series

The design is fully compatible with popular models, guaranteeing **easy installation** and stable seating in the slot. The battery works with the following versions:

- V12 Detect Slim
- V12 Detect Slim Absolute
- V12 Detect Slim Motorhead
- V12 Detect Slim Complete
- V12 Detect Slim Fluffy

# Akumulator w pełni zgodny z odkurzacami z serii:

- V12 Detect Slim,
- V12 Detect Slim Absolute,
- V12 Detect Slim Motorhead,
- V12 Detect Slim Complete,
- V12 Detect Slim Fluffy

## Safety and stable energy management

The built-in BMS system **protects the device** against overloads and short circuits, monitoring every operating cycle. Such protection prevents excessive heating of the cells, which directly **affects the safety** of household members and the durability of the equipment. The robust construction helps avoid unexpected failures during cleaning.

# Bezpieczeństwo i niezawodność

Nowoczesny system  
zarządzania energią (BMS)  
chroni urządzenie przed  
przegrzaniem,  
przeciążeniem  
i zwarcieniem.

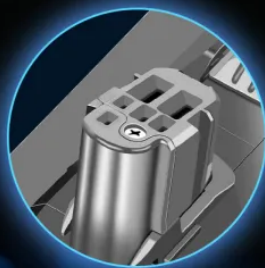

## Details affecting durability

The housing made from a combination of **ABS and PC** materials is highly resistant to mechanical damage. Precise contact terminals and a standard charging port make everyday use **intuitive and hassle-free**. Every finishing element has been designed to work perfectly with the vacuum cleaner's aesthetics and functionality.
