Price: **39.00 zł** gross / 31.71 zł net

Manufacturer: EXTRALINK

Referention number: DNXXGHINMHRMMJJ

Information:

The adjustable bicycle kickstand ensures stable and safe parking of the bicycle even on uneven or slippery surfaces. Thanks to the height adjustment, it can be easily adapted to most types of bicycles and terrain conditions. Made of lightweight, durable aluminium, it is resistant to corrosion and damage, and the non-slip foot increases grip and protects the bicycle from tipping over. Simple installation allows it to be quickly fitted to the bicycle without specialist skills.

Full product description

Adjustable bicycle kickstand - stability in every situation

Every cyclist knows the problem of parking a bike on uneven ground, where it is difficult to keep the bike in a stable position. **Adjustable kickstand** is a **support** that allows the bike to be easily positioned in a safe stance, even on uneven surfaces. Thanks to the **side stand** and adjustable height, this is an **accessory** that significantly increases the comfort of using the bike.

Adjustable height for convenience

Adjustable support leg allows for **height adjustment**, which makes the **kickstand** compatible with most types of bicycles. Height adjustment allows the leg to be adapted to different types of surfaces, ensuring the **stability** of the bike in various conditions. As a result, the **bike** will not tip over, even if parked on uneven ground.

High-quality workmanship

Adjustable support leg kickstand is made of **high-quality aluminium**, which ensures durability and resistance to damage. This material is lightweight, yet very robust, guaranteeing long-term use without the risk of damage. **Aluminium** makes the **support** resistant to corrosion and weather changes, so it will perform well in all conditions.

Simple installation

Installing the **side stand** is quick and **simple** – just screw it onto the bike using the included accessories. Because the **adjustable support leg side stand** is easy to install, it can be fitted in a few minutes without the need for tools. **Installation** is intuitive and does not require specialist skills, so every cyclist can manage the fitting.

Non-slip foot ensures stability

The **non-slip foot** in the bicycle kickstand provides **reliable stability** on any surface, eliminating the risk of the bike falling over. Thanks to this feature, the **bike** remains stable even on slippery surfaces, such as wet pavements or tarmac. The **adjustable support leg side stand** also does not scratch the bike frame, protecting the equipment from damage.
