Full product description

Emerio oil heater HO-105589

The **Emerio HO-105589 oil heater** is a valuable addition to your home during the cold winter months. The heater is suitable for rooms up to 30 sq. ft. and comes with an adjustable thermostat, three heating levels and safety features such as overheat protection and a rocker switch.

Features of Emerio HO-105589 oil heater

Stay warm during the long, cold winter months

Emerio HO-105589 is equipped with nine heating fins, **an adjustable thermostat** and three temperature settings to keep any room up to 30 m² comfortable and warm. Thanks to its practical wheels, you can easily move it around the house. It is also safe to use, as it is equipped with both overheat protection and a tip-over switch.

Recommended room size

This oil heater is suitable for rooms of **up to 30 m²**. The unit is portable, so it can be easily moved and set up in any room.

Temperature settings

The heater offers three different power settings: 800, 1200 and 2000 watts. This means you can easily adjust the heat according to the size of the room you are in and the coldness you feel.

Thermostat

The device is equipped with an adjustable thermostat.

Safety features

To protect you and household members from accidents, the heater is protected against overheating. The heater will automatically turn off when it is knocked over.
