Price: **9.99 zł** gross / 8.12 zł net

Manufacturer: EXTRALINK

Referention number: DNXEDMILKMMHJ

Product features

Wall mountable	No
Rack mounting	No
Ethernet LAN (RJ-45) ports	2
Plug and Play	Yes
Cabling technology	10/100
Package type	Box
Ethernet interface type	Fast Ethernet
Easy to install	Yes
Power over Ethernet (PoE)	Yes
Power over Ethernet (PoE) voltage	48 V
RJ-45 output ports	1
RJ-45 input ports	1
Product colour	White
Product weight	44 g

Full product description

EXTRALINK 1 PORT POE INJECTOR AND SPLITTER

Poe injector and splitter set is an ideal solution when you need to power a device that does not support either IEEE 802.3af or passive PoE, but due to the location of the device there is a need to power it over twisted pair cable. In addition to supplying power, simultaneous network communication at a speed of 100Mbps is also possible.

The set consists of an injector that feeds voltage into the Ethernet cable and a splitter that feeds voltage into the jack connector. The maximum input voltage is 48V DC. The power injector can be used to connect to a surveillance system with IP cameras that do not support Power over Ethernet or to wireless LAN access points. Using PoE injectors and splitters means you can use non-PoE switches.
