Full product description

EXTRALINK PLC 1:16 2.0mm fiber optic splitter without connectors

Fibre optic splitters are used in FTTH networks, where the Internet is delivered to customers by means of optical fibre. It is led from the server room to the client device without changing the transmission medium. The specificity of this technology requires that the signal is distributed to the clients without using additional active devices.

Splitter PLC with symmetrical 1:16 power distribution without both input and output connectors. The ABS enclosure enables safe installation in rack switches or external fiber optic cabinets.

The Splitter is built on a 2.0 mm patchcord cable so it can be safely installed in switches and cabinets.

The product is packaged in blister packs to prevent tangling of cables.
