Price: **29.32 zł** gross / 23.84 zł net

Manufacturer: EXTRALINK

Referention number: DNXFMPNQLRMNMK

Information:

PLC 1:2 fibre optic splitter with SC/APC adapters designed for FTTH networks, enabling symmetrical splitting of the optical signal without the use of active devices. Thanks to the adapters on both the input and output, it provides convenient connection, while the pocket-style housing makes quick installation in patch panels and outdoor enclosures easier, while also protecting the fibre from damage. The clips used stabilise the splitter and secure it against falling out.

Product features

Connector(s)	3
Material	ABS
Number of connectors	3
Product colour	Black
Type	Cable splitter

Full product description

1:2 PLC fiber optic splitter with SC/APC adapters

Fiber optic splitters are used in FTTH networks, where the Internet is delivered to customers via a fiber optic cable led from the server room to the client device - without changing the transmission medium. The specificity of this technology requires that the signal is distributed to customers - without using additional active devices.

Splitter PLC with symmetrical 1:2 power distribution, with both input and output adapters. Pocket type housing allows quick installation in external switches and boxes, minimizing the risk of fiber damage.

The splitter is mounted with clips that hold it and prevent it from falling out.
