Price: **18.33 zł** gross / 14.90 zł net

Manufacturer: EXTRALINK

Referention number: DNXFFKQLKRMNH

Information:

Extralink 1:2 PLC Splitter is a passive fibre optic splitter that divides optical power from one fibre into two outputs. Thanks to PLC planar technology, it provides high optical performance in a compact size, making installation in fibre optic networks easier. The product also stands out for its increased mechanical resistance of the fibre, which translates into greater durability and operational reliability. It is a practical solution for efficient signal distribution in modern optical installations.

Product features

Connector(s)	3
Material	Polyvinyl chloride (PVC)
Number of connectors	3
Product colour	White
Connector gender	No
Type	Cable splitter

Full product description

Extralink 1:2 PLC Splitter

An optical splitter is a passive fiber optic component designed to divide the optical power coming from one fiber to two. PLC splitters allow to achieve high optical performance of the link with small size of the device itself due to planar technology. The fiber of the PLC 1:2 splitter is characterized by increased mechanical resistance.
