Price: **94.54 zł** gross / 76.86 zł net

Manufacturer: EXTRALINK

Referention number: DNXEDJQMERMMGL

Information:

The EXTRALINK FBT 1:4 70:10:10:10 fibre optic splitter with SC/APC connectors is a solution for FTTH networks, enabling passive splitting of the optical signal without the use of additional active devices. The asymmetric power split allows the signal to be efficiently distributed to four receivers, while the ABS housing ensures safe installation in rack patch panels and outdoor fibre optic cabinets. The 2.0 mm patchcord cable makes it easier to route the cables neatly, and the blister packaging protects against tangling.

Product features

Connector(s)	5
Material	ABS
Number of connectors	5
Product colour	Green
Type	Cable splitter

Full product description

EXTRALINK Fiber optic Splitter FBT 1:4 70:10:10 2.0mm with SC/APC connectors

Fiber optic splitters are used in FTTH networks, where the Internet is delivered to customers by means of an optical fibre led from the server room to the client's device without changing the transmission medium. The specificity of this technology requires that the signal is distributed to customers without using additional active devices.
