Price: **12.79 zł** gross / 10.40 zł net

Manufacturer: EXTRALINK

Referention number: DNXGFPISDRMMKI

Information:

Fibre optic splitters are a key element of FTTH networks, in which the internet is delivered directly via fibre optic cable from the server room to the customer's device, without changing the transmission medium. They enable passive signal splitting to multiple recipients without the need for additional active devices, which simplifies installation, increases reliability, and supports the efficient construction of modern fibre optic networks.

Product features

Connector(s)	5
Number of connectors	5
Type	Cable splitter

Full product description

Fiber optic splitters **are used in FTTH networks**, in which the Internet is delivered to customers via fiber optic cable. It is routed from the server room all the way to the client device without changing the transmission medium. The specifics of this technology require that the signal is distributed to customers without the use of additional active devices.
