Price: **20.61 zł** gross / 16.76 zł net

Manufacturer: EXTRALINK

Referention number: DNXLLLSKEJQ

Information:

The EXTRALINK PLC 1:8 fibre optic splitter is a passive solution for FTTH networks, enabling symmetrical splitting of the optical signal without the use of active devices. The model without connectors on the input and output provides flexible installation, while the compact steel box housing makes installation in patch panels and fibre optic closures easier. The thin 0.250 mm pigtail cable allows convenient routing in organisers, and the blister packaging protects the cables from tangling. It is a practical and reliable component of fibre optic infrastructure.

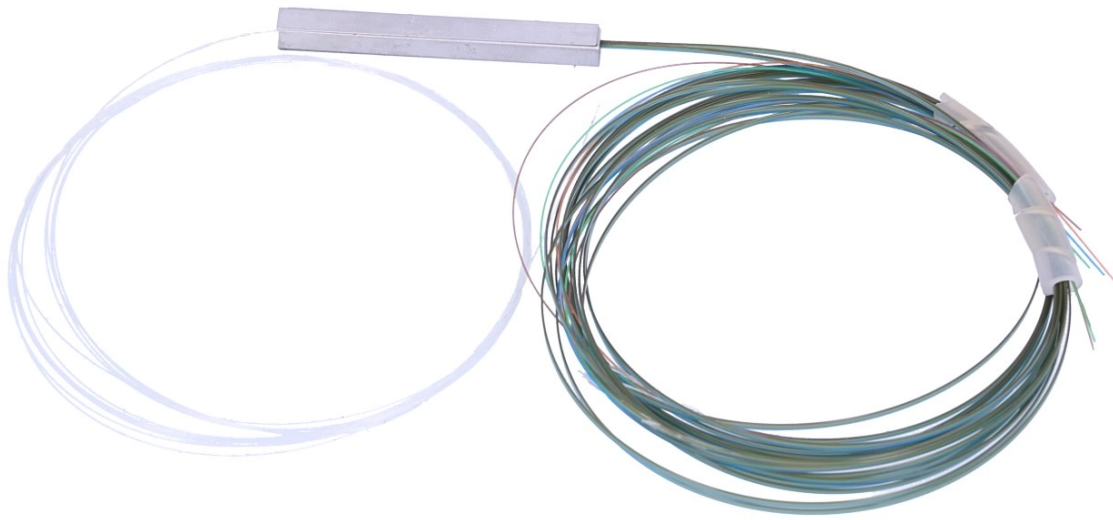

Product features

Connector(s)	9
Material	Polyvinyl chloride (PVC)
Number of connectors	9
Product colour	Grey
Type	Cable splitter

Full product description

EXTRALINK PLC 1:8 0.250mm fiber optic splitter without connectors

Fibre optic splitters are used in FTTH networks, where the Internet is delivered to customers by means of optical fibre. It is led from the server room to the client device without changing the transmission medium. This technology requires that the signal is distributed to the clients without using additional active devices.

Splitter PLC with symmetrical 1:8 power distribution without both input and output connectors. The compact steel box housing enables easy installation in switches and fiber optic couplers.

The Splitter is built on a thin 0.250mm pigtail cable, which makes it easy to install in various types of organizers.

The product is packaged in blister packs to prevent tangling of cables.
