Full product description

EXTRALINK fiber panel patch for 24 fibers (24 SC SIMPLEX)

Patch fiber optic panel is used to terminate fiber optic cables and switch fiber links. The switch is designed for mounting in 19" racks and racks. The pull-out design provides easy access to the inside of the panel patch without the need to remove it from the rack rails. The switch is used to organize fiber optic cables with adapters, pigtails and weld trays.

The whole is made of steel sheet and powder painted white. Inside there is a screw fixing the weld trays and organizers for cable routing.

At the back of the switch there are 4 holes for chokes and 20 outlets for thin drop cables.
