Price: **37.99 zł** gross / 30.89 zł net

Manufacturer: EXTRALINK

Referention number: DNXFMPISIRMNHO

Information:

The Extralink modular 24-port patch panel is a practical element of structured cabling for installation in a 19" rack cabinet. It is used for terminating cables in the distribution cabinet and provides convenient, organised management of network connections. Thanks to its modular design, keystone modules of the chosen category and shielding can be installed in each opening, allowing the panel to be adapted to the specific needs of the installation. The RJ-45 ports are connected to active devices using suitable patch cords, which helps maintain the standard and flexibility of the network configuration.

Product features

Ports quantity	24
Width	482.6 mm
Cable shielding	U/UTP (UTP)
Rack capacity	1U
Product colour	Black

Full product description

Extralink modular patchpanel 24 ports

The patchpanel is one of the basic elements used for structural cabling. It is installed in 19" racks. The screws used for assembly are the same as for active devices. The main purpose of the patchpanel is to terminate the cables coming down to the distribution cabinet.

The RJ45 patchpanel ports connect to the active device using patchcords of the appropriate category and design to maintain the appropriate connection standard. Its unique feature is its modularity - keystones of different categories can be mounted as needed.
