Information:

The standing EXTRALINK 27U 600 × 1000 rack cabinet is a robust solution for offices, server rooms and CCTV installations. Made of cold-rolled steel, it ensures durability and the safety of equipment. The front doors made of tempered glass are lockable and can open to the left or right. Removable side panels make maintenance easier, and 4 cable entries in the bottom panel help with neat cable routing. The cabinet has a height of 27U, an overall height of 132 cm, adjustable feet and heavy-duty castors. The roof is prepared for the installation of 4 fans, which supports effective cooling of the equipment.

Full product description

EXTRALINK 27U 600X1000 standing rack cabinet

The Extralink rack cabinet is designed for offices, network server rooms, and control rooms of CCTV installations. The walls are made of cold-rolled steel sheet, while the front doors are made of tempered glass with the possibility of opening to the left or right side.

Extralink network cabinet 27HE – upright installation

The network cupboard is designed in offices, network servers and CCTV control rooms.

The outer walls are made of cold-rolled sheet steel.

Fitted with tempered glass, the front door may be opened to the left or right.

Clearly marked height

Vertical rails have the appropriate height marking, which is as high as **27U (unit)**, which provides sufficient space for the installation of many equipment for our infrastructure. The total height of the cabinet is **132 cm**.

weight

Easy removal of side walls

Snap fasteners on the side walls allow for their disassembly. **Locks and keys are included.**

NETWORK CABINET 27HE

Removable side panels for easy maintenance

Front and rear doors

Adjustable cable entry dimensions for top cover and base plate

Front door key lock

Front door with small tempered glass lock

Adjustable feet, durable castors

Door can be opened to the left and right

Easy cable routing

The lower panel has as many as **4 culverts** to pull out the cables, thus reducing the risk of squeezing and entanglement in the cabinet.

The task of network enclosures is to protect equipment and guarantee stable functioning and maintain order in every sphere.

Ceiling adapted to the installation of fans

On the ceiling of the cabinet there are **4 places to install fans** for better cooling of the devices and **additional conduit** for pulling out cables.
