Information:

The Extralink 27U 600x800 server cabinet in black is a robust and spacious solution for server rooms, offices and other technical rooms. Made of durable cold-rolled steel, it provides security and resistance to damage, and the maximum load capacity of 1000 kg allows even heavy equipment to be mounted. The front tempered glass door is fitted with a lock, and its opening direction can be changed to the left or right. Removable side panels, adjustable feet, heavy-duty castors and adjustable cable entry points make installation, servicing and cable management easier.

Full product description

EXTRALINK 27U 600x800 rack cabinet, standing

The Extralink rack cabinet is designed for offices, network server rooms and CCTV control rooms. The external walls are made of cold-rolled steel sheet, while the front door has a tempered glass pane with the possibility of opening to the left or right side.

Extralink network cabinet 27HE – upright installation

The network cupboard is designed in offices, network servers and CCTV control rooms.

The outer walls are made of cold-rolled sheet steel.

Fitted with tempered glass, the front door may be opened to the left or right.

Clearly marked cabinet height

Vertical rails have the appropriate height marking, which is as high as **27U (unit)**, which provides sufficient space for mounting more devices. The total height of the cabinet is **132 cm**.

Extralink has accessories for its cabinet series, you can find in our range:

- shelves, enclosures, cable organisers
- cooling accessories, ventilation panels, thermostats
- assembly aids

Easy removal of side walls

Snap fasteners on the side walls allow for their disassembly. **Locks and keys are included.**

NETWORK CABINET 27HE

Removable side panels for easy maintenance

Front and rear doors

Adjustable cable entry dimensions for top cover and base plate

Front door key lock

Front door with small tempered glass lock

Adjustable feet, durable castors

Door can be opened to the left and right

Easy cable routing

The lower panel has as many as **4 culverts** to pull out the cables, thus reducing the risk of squeezing or tangling them.

The task of network enclosures is to protect equipment and guarantee stable functioning and maintain order in every sphere.

Fan-installed ceiling

On the ceiling of the cabinet there are **4 spaces for installing fans** for better cooling of the devices, as well as **additional conduit** for pulling out cables.
