Price: **49.99 zł** gross / 40.64 zł net

Manufacturer: EXTRALINK

Referention number: DNXFMPISMRNLK

Information:

The Extralink 4P+6P+8P crimping tool with lock is a practical tool for terminating connectors on twisted-pair cables. It allows you to crimp RJ-45, RJ-12 and RJ-11 connectors, both shielded and unshielded. Equipped with a handle lock, it ensures comfort and safety during use by preventing the jaws from opening until the lock is released. The built-in blades also allow you to cut the cable and score its outer sheath, which increases the tool's functionality and makes network installation work more efficient.

Full product description

Extralink crimping machine 4P+6P+8P with locking device

The Extralink crimping tool is a tool for making connectors on twisted-pair cables. Three types of connectors can be crimped: RJ45, RJ12 and RJ11. Shielded and unshielded versions are supported.

The crimping tool is equipped with a handhold lock that prevents the clamps from opening until they are released. The tool has built-in blades to cut the cable or to cut the outer cable jacket.
