Full product description

Switch with 7 PoE ports and one 100Mbps Uplink port

It is a switch characterized by high performance and has **8 10/100 Mb/s** ports, including 7 ports with PoE support. The switch is powered by an external power supply with **from 18V to 57V**. The PoE supply voltage depends on the power supply used. The device is designed for home or small business use. It is an inexpensive solution for solutions where power to the devices is not available or too expensive to install.

Main features of the device:
