Full product description

Open the world of flying to your child

The Extralink A23 is an excellent choice for a **first drone** for young technology enthusiasts. With its intuitive operation, modern features and compact design, children can easily control the drone and discover how exciting sky adventures can be. It's not just a toy, but also a tool to help **motor coordination** and develop manual skills. With this drone, every child will feel like a real pilot!

Drone for kids - controls for beginners

The drone was designed with children and beginners in mind. Features such as **automatic takeoff and landing**, **altitude hold** and **Headless Mode** make it easy to control the device. It's a great choice for a **first drone** to teach kids the basics of flying.

Safe and durable design

Equipped with **propeller guards**, the Extralink A23 minimizes the risk of damage during use. Its compact and lightweight design makes it resistant to minor falls and collisions. As a result, parents can rest assured about the safety of their child and the drone itself.

Unforgettable fun thanks to the rechargeable battery

With a **380 mAh modular battery**, the drone offers up to 13 minutes of flight on a single charge. That's enough time to fully enjoy skyward aerobatics and hone your control skills. **Quick charging** with the included USB cable ensures short intervals between flights.

Built-in aerobatics and LED light functions

The A23 drone offers spectacular **360° aerobatics** that will delight any little pilot. Additional **LED lights** make flying even more exciting, especially after dark. It's a great toy for any occasion and provides plenty of excitement and fun.

One Key Takeoff

Headless Mode

3 Speed Modes
