Price: **219.00 zł** gross / 178.05 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGKPJKRMMMLN

Information:

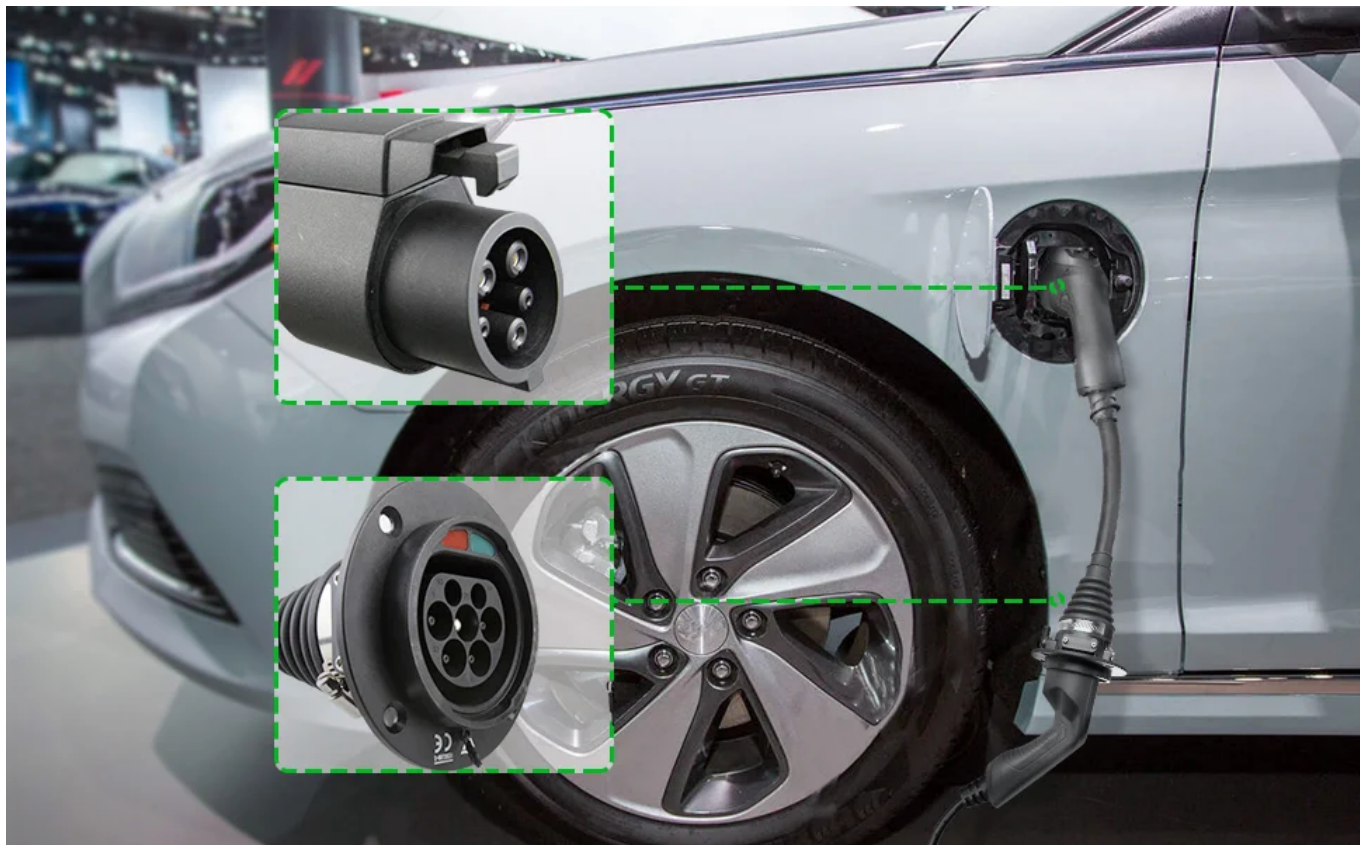

The electric vehicle charging adapter enables quick and convenient conversion of a Type 2 charging station into a single-phase Type 1 32A connector. This practical solution allows you to use a greater number of charging points and increases compatibility with vehicles equipped with a Type 1 socket. The adapter is ideal for everyday use, providing convenient charging without the need to replace the station.

Product features

Input voltage	240 V
Output voltage	240 V
Power supply type	Auto
Input frequency	50 Hz
Output power	3840 W
Product colour	Black
Power current type	DC1-to-DC2
Watch case material	Acrylonitrile butadiene styrene (ABS)
Designation	Battery charger

Full product description

Electric vehicle charging adapter converts a Type 2 charging station into a Type 1 32a single-phase charging station

1. Input voltage: 230 V 6-32 A (single-phase power supply). Output power: 1.2 - 7.2 kW AC (depending on input current)
2. Ideal for families with 2 electric cars or plug-in hybrids (PHEVs) with different types of plugs
3. Converts type 2 (IEC62196) to type 1 (SAEJ1772). This adapter avoids replacing the charging socket
4. The IEC 62196-2 adapter has an IP 54 rating and can operate at temperatures from -30 °C to 55 °C. The housing material is thermoplastic (flame retardant class UL94 V-0). The EV plug adapter is flame retardant, pressure and wear resistant
