

Extralink AGM 12V 18Ah | Accumulator | maintenance free

link to the product:

<https://www.batna24.com/gb/p/batteries/extralink-agm-12v-18ah-accumulator-maintenance-free>

Price: **120.00 zł** gross / 97.56 zł net

Manufacturer: EXTRALINK

Referention number: DNXLGKSKEGP

Product features

Battery capacity	20 Wh
Battery capacity	18 Ah
Battery voltage	13.5 V
Package weight	4900 g
Package weight	4.9 kg
Package depth	181 mm
Package height	76 mm
Package width	166 mm
Battery technology	Sealed Lead Acid (VRLA)
Hot-swap battery	Yes
Product colour	Black
Product weight	4900 g

Full product description

Extralink battery

The Extralink AGM 12V battery is a 12-volt battery with a capacity of 18 ampere hours. **The battery** is an energy storage device that can be discharged and recharged several times.

In AGM VLRA batteries (Valve Regulated Lead Acid) the electrolyte is absorbed in a glass mat separator.

More and more often they replace well-known acid or alkaline models due to their properties:

- no special maintenance or electrolyte topping up required
- the rooms where the batteries are installed do not need additional ventilation
- they perform well in buffer operation - their service life is up to 5 years
- less internal resistance and higher energy efficiency than traditional batteries
- Much lighter and smaller than acid batteries, with the same capacity
- more resistant to extreme temperatures, vibrations and shocks

VLRAs are batteries that normally do not emit gases and remain tight. This means they do not need to be installed in special ventilated rooms. They can be placed and used in any position. The reduction of electrolyte leakage outside the casing significantly reduces the corrosion process in the battery's operating environment, which has a positive impact on environmental protection.
