Price: **1,080.00 zł** gross / 878.05 zł net

Manufacturer: EXTRALINK

Referention number: DNXFMPJLLRMPPM

Information:

The Extralink AGM VLRA battery with a capacity of 200 Ah is an efficient and reliable power source for repeated charging and discharging. Thanks to AGM technology, the electrolyte is absorbed into the glass mat, ensuring maintenance-free operation without the need to top up the electrolyte or provide additional room ventilation. The battery stands out for its high efficiency, low internal resistance, compact dimensions and lighter weight compared with traditional lead-acid models. It performs well in buffer operation, offering a service life of up to 5 years, as well as good resistance to temperatures, vibrations and shocks.

Product features

Battery capacity	200 Ah
Battery voltage	12 V
Battery technology	Sealed Lead Acid (VRLA)
Product colour	Black

Full product description

Extralink battery, battery capacity 200 amp-hours

The Extralink battery is an AGM battery with a battery capacity of 200 amp-hours. The battery is a device designed to store energy, and can be repeatedly discharged and recharged with electricity.

In AGM VLRA (Valve Regulated Lead Acid) batteries, the electrolyte is absorbed in a separator made of glass mat.

They are increasingly replacing the well-known acid or base models because of their properties, such as:

- rooms where batteries are installed do not need additional ventilation
- do not require specialized maintenance and topping up of electrolyte
- much lighter and smaller than acid batteries while maintaining the same capacity
- perform well in buffer operation - their service life is up to 5 years
- More resistant to extreme temperatures, vibration and shock
- Lower internal resistance and higher energy efficiency than traditional batteries
