Price: **64.99 zł** gross / 52.84 zł net

Manufacturer: EXTRALINK

Referention number: DNXGFQHPIRMMMI

Information:

The Extralink AGM 12V 9Ah battery is a maintenance-free, sealed and safe power source with a long service life of up to 600 cycles. AGM/VRLA technology provides resistance to vibrations, extreme temperatures and the ability to operate in any position. It works well as backup and emergency power in UPS systems, alarms, monitoring, cash registers and emergency lighting, as well as in mobile devices, wheelchairs, lawnmowers or during camping. Its compact dimensions and low weight of 2.5 kg make installation and transport easier.

Product features

Battery capacity	9 Ah
Battery voltage	12 V
Battery technology	Sealed Lead Acid (VRLA)
Product colour	Black

Full product description

The battery is a solution designed to store energy that can be discharged and recharged several times.

More and more often they replace well-known acid or alkaline models because of their properties:

- no special maintenance or electrolyte topping up required
- the rooms where the batteries are installed do not need additional ventilation
- they perform well in buffer operation - their service life is up to 5 years
- less internal resistance and higher energy efficiency than traditional batteries
- Much lighter and smaller than acid batteries with the same capacity
- more resistant to extreme temperatures, vibrations and shocks

VLRAs are batteries that do not emit gases under normal conditions and retain their tightness. This means they do not need to be installed in special ventilated rooms. Additionally, they can be installed and used in any position. Reducing the escape of electrolyte outside the housing significantly reduces corrosion in the battery's working environment and helps to protect the environment.
