Price: **329.00 zł** gross / 267.48 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGKIJMRMMIM

Information:

The Extralink Aladdin portable paraffin heater is an efficient, mains-independent heat source with a power output of 2600 W, ideal for the home, garden, tent, balcony or camping. Thanks to its 4.6 l tank, it runs for up to 15-18 hours on a single fill and quickly heats an area of approx. 12 m². It can not only provide heat, but also serve as a source of light and help boil water. It is equipped with power adjustment, a paraffin level indicator, manual ignition and two wicks included. The durable construction with a fibreglass wick ensures convenient and long-lasting use.

Full product description

Heat source for hours without requiring electricity

Extralink Aladdin portable kerosene heater with high efficiency creates a comfortable and warm environment around you. **The Aladdin heater** will be ideal to help you solve problems related to the lack of electric heating or as a heat source during the winter. It will also warm you while camping and allow you to boil water making it easier to prepare a warm drink or meal.

EXTRALINK ALADDIN KEROSENE HEATER EKH-460 4.6L batna24

The main features of the kerosene heater Extralink Aladdin

- Heating power 2600W
- Fuel tank 4.6L
- Can be used as a source of light
- Non-flammable, fibreglass wick
- Power control and kerosene level indicator
- 2 wicks included (one already installed)
- Ignition: manual (match or lighter)
- Device for outdoor use

Efficient heating with kerosene

The combustion chimney of the portable non-electric outdoor kerosene stove is made of special metal, which ensures full combustion of kerosene, and heating is faster and more efficient. The heater has one wick pre-installed and one additional wick included.

Long operating time on one tank

The **Extralink Aladdin** can keep you warm for **15-18 hours on a full tank**. It is ideal for daily supplemental heating needs and emergency situations. Its maximum calorific value is 9000BTU/H (equivalent to 2600W), and its fuel consumption per hour is about 0.4L/hour. It can quickly heat an area of about 12 square meters.

Wide range of applications

Kerosene heaters can be used at campgrounds, gardens, tents, balconies. The kerosene stove can heat, cook and illuminate the surroundings, the portable design allows it to be used during camping trips, fishing or during a picnic as an emergency heat source.

Comfortable and easy to maintain

The appearance of the product is classic and fashionable, the design is practical, maintenance is convenient, and accessories can be replaced. The core is made of heat-resistant material, which ensures long life and high durability.

Four small images showing cooking activities: grilling meat, cooking in a pot, boiling pasta, and pouring coffee.
