Full product description

Meet Extralink Amaris - the ideal fiber optic box to support your network.

This product combines reliability, ease of installation and aesthetic design, meeting the needs of both professionals and amateurs.

Exceptional durability

The Extralink Amaris fiber optic box is made of high-quality plastic and polyvinyl chloride (PVC), which ensures its **longevity and resistance to damage**. Thanks to its robust construction, this product is ideal for various applications in harsh environments. The safety of your network is guaranteed by the reliable materials used in production.

Compact and functional

Extralink Amaris supports up to 8 splices, making it ideal for smaller fiber optic installations. Its compact size allows for easy placement in any mounting cabinet, saving valuable space. **Flexibility of installation and ease of use** make this product extremely functional.

Aesthetic design

The white Extralink Amaris enclosure not only provides technical protection, but also **looks elegant and modern**. It fits perfectly with other elements of the network infrastructure, adding a professional look to any installation. Aesthetics and high quality workmanship are the features that set this product apart from the competition.
