Full product description

Bracket for mounting a satellite dish on the balcony

The robust steel balcony holder is a good choice for people living in bunker houses or blocks of flats. The shape and dimensions of the holder allow for comfortable mounting of the antenna on the railing. The use of galvanized steel ensures **resistance to corrosion** and other damage.

Mounting the antenna holder on the balcony

The handle with a total length of 300 mm, a height of 250 mm and a diameter of 38 x 1.5 mm is mounted from the bottom by means of a cybranch, so **there is no need to drill**. Installation of the antenna bracket is easy and quick, as well as possible change of its position.
