Information:

Solid steel balcony bracket for mounting a satellite dish on a railing, ideal for flats in apartment blocks and multi-storey houses. Made of galvanised steel, it is resistant to corrosion and damage, ensuring durability for years. Top mounting using U-bolts does not require drilling, making installation quick and easy and allowing the bracket position to be changed easily. Dimensions: length 300 mm, height 250 mm, diameter 38 x 1.5 mm.

Product features

Maximum load weight	10 kg
Mounting kit	Yes
Coating	Galvanized coating
Material	Stainless steel
Product colour	Metallic
Type	Angle bracket
Designation	General purpose

Full product description

Bracket for mounting a satellite dish on the balcony

The robust steel balcony holder is a great choice for people living in bunker houses or blocks of flats. The shape and dimensions of the holder allow for comfortable mounting of the antenna on the railing. The use of galvanized steel ensures **resistance to corrosion** and other damage.

How to mount the antenna mount on the balcony

The handle with a total length of 300 mm, a height of 250 mm and a diameter of 38 x 1.5 mm is mounted from above with the use of a cybranch, so **no drilling is needed**. Installation of the antenna bracket is easy and quick, as well as possible change of its position.
