Information:

Extralink Beauty Intelligent Water Flosser L10 is a cordless dental irrigator that, thanks to pulsation technology, effectively removes residue and stains from hard-to-reach areas, while massaging the gums and supporting their health. It helps reduce gum bleeding and bad breath, and is also suitable for braces and bridges. It has a 300 ml tank, a non-slip handle, 3 operating modes, 5 interchangeable nozzles and 3 tips for different needs. Its quiet, compact design is ideal for home and travel, and the battery can last up to 35 days on a full charge.

Full product description

Innovative oral hygiene technology

The Extralink Beauty Intelligent Water Flosser L10 combines oral hygiene with improved gum health using the latest pulsation technology. By delivering high-pressure water pulses that vary between 1,600 and 1,800 times per minute at 60-130PSI, it effectively removes hidden stains deep in the mouth. It not only provides a thorough cleaning, but also massages the gums, improving blood circulation and solving problems such as bleeding gums and bad breath. In addition, it provides care for braces and bridges.

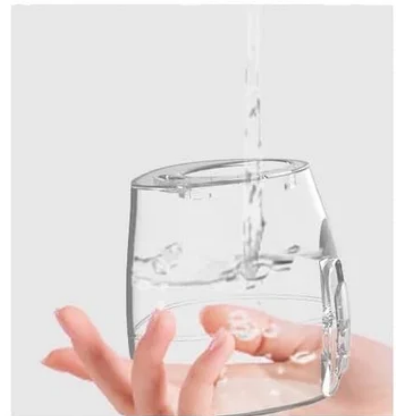

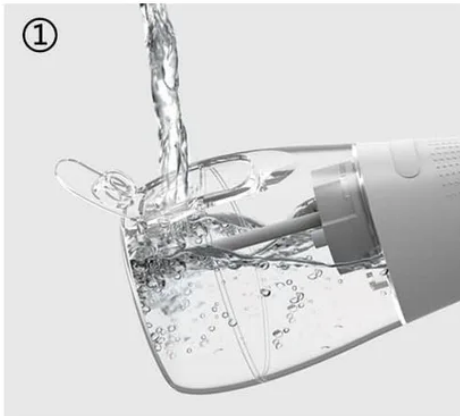

Designed for convenience

Created with user comfort in mind, the dental irrigator has a 300 ml reservoir and a non-slip back for easy holding and maneuvering. Three indicator lights make it easy to select the mode of operation, and the simple and functional design makes daily oral care easy. Thanks to the device's cordless design, bathroom countertops remain free of unnecessary clutter.

 300ml

Tailored solutions for oral care

Because every mouth is unique, the dental irrigator is equipped with five interchangeable nozzles and three nozzle caps to suit different oral areas and user needs. Whether used individually or as a family, its lightweight and compact design make it an ideal travel companion. With three modes and quiet operation, this irrigator meets a variety of oral hygiene needs.

Long battery life

Say goodbye to the need for frequent recharging with a powerful, eco-friendly battery. Its single charge of 4-5 hours provides up to 35 days of use. Compatible with a variety of charging devices via a USB cable, as well as dual seals and an IPX6 rating that protects against water leaks, the water irrigator is not only reliable, but also efficient. It is an indispensable piece of equipment both on the go and at home, ensuring that your daily oral care routine is never neglected.
